Audio

The App automatic generate MP3 files within same folder into a playlist

How i-FlashDrive is different

What you'll get only on i-FlashDrive ?

Direct File Transfer

So in the end, when we'd like to transfer files with another person. The plug-unplug i-FlashDrive is still the simplest way.

Without network

At all the file transfer when using i-FlashDrive, network is not required.

Free App for file management

There's a free App for this accessory that created a user interface for file management which most of us are familiar with. It has also built-in Music Play UI, Photo Import from CameraRoll, and voice recording. Those functions that comes very handy in daily use.
