DIGITUS® Network Cabinet
Unique Series

Product Overview

The **DIGITUS® Unique Series** is designed and produced for the high requirements of the IT-Infrastructure. The **DIGITUS® Unique Series** is developed and produced for cabling and network components. They provide maximum optimization resulted to an optimum performance in between quality and added value. Each cabinet is designed with strength, ease of use and aesthetics in mind.

Features, such as 1 unit marking on the mounting profiles, easy and quick release of the door and side- and rear panels, fully adjustable front and rear profiles of the cabinet in depth, makes the product extremely attractive to installers. The incredible design of the **Unique Series** is rounded up with the use of a framed smoked safety glass front door fitted with a swing handle lock. Door hinging can be quickly reversed left to right. The **Unique Series** is available in different heights from 22 units up to 47 units. A various size of 600mm, 800mm and 1000mm depth are in the portfolio of the **Unique Series**.

Each cabinet includes a lockable glass front door and lockable steel back- and side panels. 2 sets of adjustable mounting profiles, a cable entry at the bottom and cable routing channels are equipped. Furthermore the roof is prepared for fan trays. A huge range of **DIGITUS®** accessories are available to customize the cabinet due to the needs of the end-user.

DIGITUS® Server Cabinet
Unique Series

Product Overview

The **DIGITUS®** Server Cabinet **Unique Series** is designed and produced for the safe housing of server equipment. They provide maximum optimization resulted to an optimum performance in between quality and added value. Each cabinet is designed with strength, ease of use and aesthetics in mind.

The **Unique Series** is available in 4 heights, from 26 units up to 47 units, and a choice of either 600mm or 800mm widths, depth is 1000mm. The **Unique Series** is ideal for small and mid size server rooms through to multi Data Center installations. The strength of the cabinet is the modular frame construction, which makes the cabinet very robust.

Key elements include air flow (high perforation 63%) and cooling management (ventilation). The **Unique Series** ensures easy access to equipment due to quick release side panels as well as the front and rear door. Each cabinet consists of two sets of heavy duty 19“ mounting profiles, which can be adjusted throughout the depth of the cabinet. Between these profiles are 4 sets of front to rear strength members.

The Series come up with a carrying capacity up to 1000 kg. The swing handle lock incorporates a 4-point lock on front and 3-point lock on back side of the cabinet. All in all, the Unique Server Cabinet is the perfect solution for your server room.
