

Product Environmental Profile

Harmony type XVS - Multi sound sirens

General information

Representative product

Harmony type XVS Multi sound sirens -XVS10MMW

Description of the product

The multi sound sirens are audible signaling units used for long distance indication of the operating status or sequences of a machine or installation. Type XVS10 sirens have 2 continuous or intermittent tone with very compact size, guarantees a sound level of 106 dB at 1 m.

Functional unit

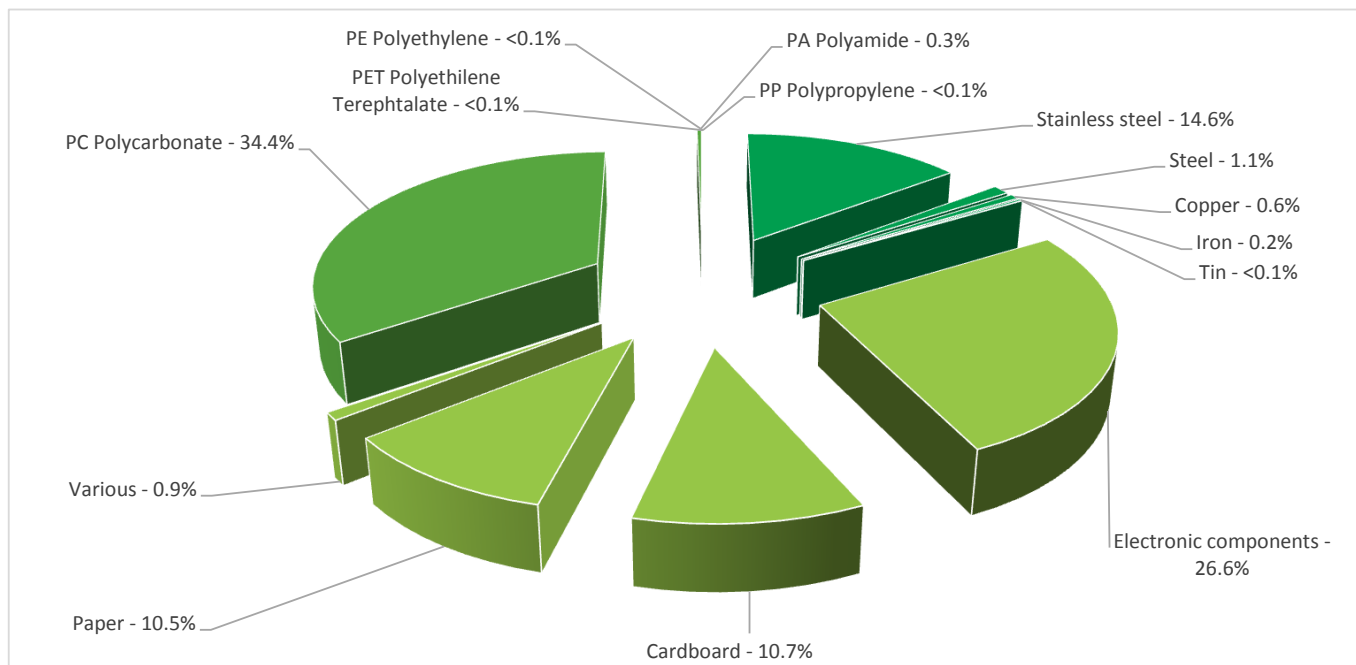

Provide audible signaling for long distance indication of the operating status or sequences of a machine or installation with the duration of 20 years

Constituent materials

Reference product mass

1040.36 g including the product, its packaging and additional elements and accessories

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

As the products of the range are designed in accordance with the RoHS Directive (European Directive 2002/95/EC of 27 January 2003), they can be incorporated without any restriction in an assembly or an installation subject to this Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

Additional environmental information

The Harmony type XVS Multi sound sirens presents the following relevant environmental aspects

Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 220.9 g, consisting of cardboard (99.5%), PE film (0.2%), PET film(0.3%) Product distribution optimised by setting up local distribution centres
Installation	XVS10MMW does not require any installation operations.
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials This product contains Electronic Board (314g) that should be separated from the stream of waste so as to optimize end-of-life treatment. Recyclability potential: 26% Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	20 years
Product category	Passive products - non-continuous operation
Installation elements	No special components needed
Use scenario	Product dissipation is 9.2 W full load, loading rate is 30% and service uptime percentage is 30% The product is in active mode 30% of the time with a power use of 9.2W and in stand-by mode 70% of the time without a power use, for 20 years
Geographical representativeness	Europe
Technological representativeness	The multi sound sirens are audible signaling units used for long distance indication of the operating status or sequences of a machine or installation. Type XVS10 sirens have 2 continuous or intermittent tone with very compact size, guarantees a sound level of 106 dB at 1 m.
Energy model used	Manufacturing
	Installation
Energy model used	Use
	End of life
Energy model used	Energy model used: Schneider plant, Japan
Energy model used	Electricity grid mix; AC; consumption mix, at consumer; < 1kV; EU-27
Energy model used	Electricity grid mix; AC; consumption mix, at consumer; < 1kV; EU-27
Energy model used	Electricity grid mix; AC; consumption mix, at consumer; < 1kV; EU-27

* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME V5.6.0.1, database version 2016-11.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
