

Product Environmental Profile

Logic Controller - Modicon M241

General information

Representative product	Logic Controller - Modicon M241 - TM241CE40U
Description of the product	The main purpose of the Modicon M241 Logic Controller is to provide a new range compact logic controller with embedded regular and fast I/O and field buses.
Description of the range	This range consists of: Modicon M241 Logic Controllers from 24 points base to 60 pointsbase. The environmental impacts of this referenced product are representative of the impacts of the other products of the range which are developed with a similar technology.
Functional unit	To perform control for applications, achieve benchmark performance and embedded motion with its 5 embedded communication ports 100% of the time for 10 years.

Constituent materials

Reference product mass	788.3 g including the product, its packaging and additional elements and accessories
------------------------	--

Plastics	27,4%
Metals	3,3%
Others	69,4%

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

As the products of the range are designed in accordance with the RoHS Directive (European Directive 2002/95/EC of 27 January 2003), they can be incorporated without any restriction in an assembly or an installation subject to this Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

Additional environmental information

The Logic Controller - Modicon M241 presents the following relevant environmental aspects

Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 159.3 g, consisting of cardboard (90%) and paper (10%)
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials This product contains 5 PCBAs (total 382g) and 1 battery (2.5g) that should be separated from the stream of waste so as to optimize end-of-life treatment. The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page Recyclability potential: 16% Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	10 years			
Installation elements	No special components needed			
Use scenario	The electrical power consumed by the Modicon M241 Logic Controller range is between 3W and 25 W. It is 3W in active mode and 0% in standby mode for the referenced Modicon M241 Logic Controller, 40 points base (ref. TM241CE40U).			
Geographical representativeness	China			
Energy model used	Manufacturing	Installation	Use	End of life
	Energy model used: Indonesia	Electricity mix; AC; consumption mix, at consumer; 220V; CN	Electricity mix; AC; consumption mix, at consumer; 220V; CN	Electricity mix; AC; consumption mix, at consumer; 220V; CN

* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.6.0.1, database version 2016-11 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

According to this environmental analysis, proportionality rules may be used to evaluate the impacts of other products of this range.

Depending on the impact analysis, the environmental indicators (except Mineral Resources Depletion, Ozone Layer Depletion and Net Use of Fresh Water of other products in this family may be proportional extrapolated by energy consumption values". For Mineral Resources Depletion, impact may be proportional extrapolated by mass of the product. For Ozone Layer Depletion, impact may be proportional extrapolated at 50% by energy consumption values and 50% by mass of the product. For Net Use of Fresh Water, impact may be proportional extrapolated at 70% by energy consumption values and 30% by mass of the product.

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
