

Product Environmental Profile

XAP Control Station Box

General information

Representative product	XAP Control Station Box - XAPK1201
Description of the product	This metal enclosure is proposed to meet various applications where robustness is a top priority and can be used with both XB4 and XB5 range
Functional unit	The main function of XAP control station box is to provide complete water tight connection for XB4 and XB5 range products during 20 years with the following dimension is 80mm x 80mm x 51mm with EN/IEC 60529 standard.

Constituent materials

Reference product mass	567 g	including the product, its packaging and additional elements and accessories
------------------------	-------	--

Plastics	0.8%
Metals	93.5%
Others	5.6%

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 2 January 2013, amended in March 2015, 2015/863/EU and in November 2017, 2017/2102/EU) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE), Bis (2-ethylhexyl)phthalate - DEHP, Benzyl butyl phthalate - BBP, Dibutyl phthalate - DBP, Diisobutyl phthalate - DIBP) as Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

Additional environmental information

The XAP Control Station Box presents the following relevant environmental aspects

Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 31.8 g, consisting of Cardboard(86.31%),Paper(13.69%) Product distribution optimised by setting up local distribution centres
Installation	Product doesn't require special installation
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials No special end-of-life treatment required. According to countries' practices this product can enter the usual end-of-life treatment process. Recyclability potential: 70% Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	20 years			
Product category	Unequipped enclosures and cabinets			
Installation elements	No special components needed			
Use scenario	Non applicable for unequipped enclosures and cabinets			
Geographical representativeness	Product used in all regions			
Technological representativeness	The Modules of Technologies such as material production, manufacturing process and transport technology used in this PEP analysis (LCA-EIME in this case) are similar and representative of the actual type of technologies used to make the product in production)			
Energy model used	Manufacturing	Installation	Use	End of life
	Energy model used: France	Electricity mix; AC; consumption mix, at consumer; 120V; US	Electricity mix; AC; consumption mix, at consumer; 120V; US	Electricity mix; AC; consumption mix, at consumer; 120V; US

Compulsory indicators		XAP Control Station Box - XAPK1201					
Impact indicators	Unit	Total	Manufacturing	Distribution	Installation	Use	End of Life
Contribution to mineral resources depletion	kg Sb eq	3.13E-04	3.13E-04	0*	0*	0*	0*
Contribution to the soil and water acidification	kg SO ₂ eq	8.84E-03	8.35E-03	3.34E-04	7.17E-06	0*	1.56E-04

* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.9.1, database version 2016-11 in compliance with ISO14044.

The manufacturing phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.

Registration number	ENVPEP2111017_V1-EN	Drafting rules	PCR-ed3-EN-2015 04 02
Date of issue	12/2021	Supplemented by	PSR-0005-ed2-EN-2016 03 29
Validity period	5 years	Information and reference documents	www.pep-ecopassport.org
Independent verification of the declaration and data
