Product Environmental Profile

SPACELOGIC KNX POWER SUPPLY

General information

Representative product	SPACELOGIC KNX POWER SUPPLY - MTN6513-1201
Description of the product	The main fuction of power supply device is to supply power to another device, at a specific voltage level, voltage type and current level.
Functional unit	To provide DC 30 V (SELV) max. 50W power to one line of the KNX fieldbus system (building automation) On top of this, to provide some diagnostic feedback via the LEDs, if everything on that line is working or not during 10 years in accordance with the standards • EN 50428: EMC directive 2014 / 30 / EU + 2014/35/EU • EN 50491-3: 2014/35/EU • EN 50491-4-1: 2014/35/EU • EN 50491-5-1: EMC directive 2014 / 30 / EU • EN 50491-5-2: EMC directive 2014 / 30 / EU • EN 50581: 2011/65/EU

Constituent materials

Reference product mass	505 g	including the product, its packaging.

	Plastics	18.7%
	Metals	8.1%
	Others	73.2%

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 2 January 2013, amended in March 2015, 2015/863/EU and in November 2017, 2017/2102/EU) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers – PBDE), Bis (2-ethylhexyl)phthalate - DEHP, Benzyl butyl phthalate– BBP, Dibutyl phthalate - DBP, Diisobutyl phthalate - DIBP) as mentioned in the Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page

Additional environmental information

The SPACELOGIC KNX POWER SUPPLY presents the following relevent environmental aspects	
Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 101.9 g, consisting of cardboard (71.43%), paper (28.55%), PE film (0.02%) Product distribution optimised by setting up local distribution centres
Installation	The product does not require special installation procedure and requires little to no energy to install. The disposal of the packaging materials are accounted during the installation phase (including transport to disposal).
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials No special end-of-life treatment required. According to countries' practices this product can enter the usual end-of-life treatment process. Recyclability potential: **20%** Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	10 years
Product category	Other equipments - Active product
Installation elements	No special components needed
Use scenario	The product is in active mode 100% of the time with a power use of 17.28 W, for 10 years
Geographical representativeness	Across Globe
Technological representativeness	The Modules of Technologies such as material production, manufacturing process and transport technology used in this PEP analysis (LCA-EIME in this case) are Similar and representative of the actual type of technologies used to make the product in production.

Energy model used	**Manufacturing**	**Installation**	**Use**	**End of life**
	Manufacturing plant: INSTA, Hohe Steinert, Germany	Electricity grid mix; AC; consumption mix, at consumer; 230V; DE	Electricity grid mix; AC; consumption mix, at consumer; 230V; DE	Electricity grid mix; AC; consumption mix, at consumer; 230V; DE

Compulsory indicators	**SPACELOGIC KNX POWER SUPPLY - MTN6513-1201**						
Impact indicators	**Unit**	Total	Manufacturing	Distribution	Installation	Use	End of Life
Contribution to mineral resources depletion	kg Sb eq	1.03E-03	9.59E-04	0*	0*	7.40E-05	0*

Exported Energy	MJ	3.22E-04	3.03E-05	0*	2.92E-04	0*	0*

** represents less than 0.01% of the total life cycle of the reference flow*

Life cycle assessment performed with EIME version EIME v5.8.1, database version 2016-11 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).") exept one indicator ADPe is mostly in manufacturing phase.

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.

Registration number	ENVPEP2007008_V1	*Drafting rules*	PCR-ed3-EN-2015 04 02
Date of issue	07/2020	*Supplemented by*	PSR-0005-ed2-EN-2016 03 29
Validity period	5 years	*Information and reference documents*	www.pep-ecopassport.org

Independent verification of the declaration and data

Internal X External

The elements of the present PEP cannot be compared with elements from another program.

Document in compliance with ISO 14021:2016 « Environmental labels and declarations - Self-declared environmental claims (Type II environmental labelling) »
