## The REACH EU Chemical Decree

The REACH EU Chemical Decree (registration, evaluation, authorization and restriction of chemicals) regulates, among other things, the use of so-called SVHCs (substances of very high concern) and PAHs (polycyclic aromatic hydrocarbons), which are commonly used in rubber manufacturing.

BKL Electronic knows the relevant requirements on industry and commerce. As a commercial company, we constantly endeavor along with our suppliers to keep improving the properties of our products so they are free of substances that present a risk. According to Article 33 of the REACH Decree (EU) 1907/2006, BKL Electronic is neither a producer nor an importer of these substances, nor brings such substances into contact with their products. Our company imports finished products into the EU. None of these products have a concentration above 0,1 percent by mass according to the latest ECHA Candidate List (see reference below) as of February 2026.
