Declaration of Conformity to EU REACH.

REGULATION (EC) No 1907/2006 Concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

Cliff Electronic Components assures that **CP30300** and packaging meet the requirements pertaining to the latest candidate list.

- **253 Substances** of Very High Concern (SVHC) published on the 4th of February 2026.

(Published in accordance with Article 59(10) of REACH Regulation, to include Annex XIV & XVII)

With reference to REACH article 33(1) it is our duty to communicate the presence of any substances that may exceed the maximum permissible threshold limit of 0.1%.

Cliff Electronic Components declares that some copper alloys, such as brass, are used in various product groups, for example Feedthroughs, Connectors and Terminals. These are classed as 'Articles', not substances. As indicated in Annex XIV, these may contain Lead (PB) (CAS number 7439-92-1) above the permitted level of 0.1%, but not exceeding 4% as permitted under the EU RoHS Directive, through exemption 6 (c) listed in Annex lll.

As this substance is fully encapsulated into the finished article, it cannot migrate or diffuse from the products, thus preventing any risks of human contact or release into the environment.

The above information is based on the ongoing due diligence shown by the collection of appropriate data regarding material information collected from third party suppliers and will be updated when necessary or deemed appropriate.

Signed on behalf of Cliff Electronic Components Limited by authorised signatory:

Dominic Aynsleigh

Quality Assurance Manager
