5th November 2025

To Whom It May Concern:

***SUBJECT: REACH & The SVHC Candidate List 2025***

This statement is relevant to the current Candidate List of SVHCs and any future publications of the candidate list in the following 12 months.

In accordance with Article 33 of REACH substances that are on the Candidate List of SVHCs and present in CRC Industries UK products above the regulatory threshold of 0.1% by weight will be communicated via the SDS (Safety Data Sheet).

CRC Industries UK will actively monitor its product range for SVHS's on the Candidate List above the regulatory threshold of 0.1% by weight on each new update and where required report their presence in the respective product SDS.

Relying on the existing supply chain communication channels allows companies to comply with all the downstream user obligations related to substances in the Candidate list and this will remove the need for downstream users to request statements for the "absence of SVHCs" for each update of the Candidate List.

Anneke Segers  
R&D director EMEA
