Subject: EU REACH Regulations

Dear Valued Business Partner:

Arrow Electronics, Inc. or one of its affiliates or wholly owned subsidiaries (collectively, "Arrow") is in receipt of your inquiry regarding the European Union's ("EU") regulation of hazardous and other substances in products pursuant to the Registration, Evaluation, Authorization and Restriction of Chemicals regulation ("REACH"). It is Arrow's policy to respond to such matters through its corporate offices.

As a global provider of products, services, and solutions to industrial and commercial users, Arrow takes seriously its responsibility to ensure its businesses are in compliance with both the letter and spirit of all applicable laws and regulations, including those focused on substances of very high concern ("SVHCs") and their impacts on human health and the environment. Arrow complies with its obligations under REACH by informing its customers in the European Union of the presence of SVHCs in concentrations above 0.1% weight by weight (w/w) in the products we distribute, where required.

Arrow continuously monitors new developments relating to regulation of hazardous substances, including updates to the Candidate List of SVHCs. As regulations are updated, Arrow will continue to meet its obligations to provide information to its customers in a timely manner concerning the presence of covered substances in products.

While Arrow's operations outside of the European Union are beyond the scope of REACH, we understand the importance of compliance to our business partners. For information on specific components, we suggest you contact SiliconExpert, a wholly owned subsidiary of Arrow. SiliconExpert works directly with component and product manufacturers to obtain compliance data, including information related to hazardous substance content. Please contact sales@siliconexpert.com for more information.

For any additional inquiries regarding Arrow's compliance with REACH, please reach out to your Arrow sales representative.

Thank you for your continued confidence in Arrow.

Sincerely,

Arrow Electronics, Inc.
