

## REF. EC REACH Regulation No1907/2006

Dear SNA Europe Customer,

SNA Europe has focused on serving our customers, associates, investors, suppliers and the communities where we do business. Guided by our core beliefs and values as laid out in our “Who We Are” statement, the SNA Europe Product Safety Guidelines are based on the belief that the safety of customers and users of SNA Europe’s products is of the highest importance, so we endeavor to:

- ❖ Provide safe products for customers and users of our products,
- ❖ Comply to applicable product and packaging regulatory requirements

For those products which Snap-on exports to Europe, we are in compliance with the REACH (Registration, Evaluation, and Authorization of Chemicals) Regulation No1907/2006. Such as, assessment of Preparations, SVHC (Substances of Very High Concern) for authorization currently released by ECHA, and of substances (REACH 235, dated June 14, 2023) and REACH under Annex XVII restricted dated June 28, 2023 (Restrictions on Manufacturer, Placing on the Market and Use of Certain Dangerous Substances, Preparations and Articles).

In response to your enquiry regarding European Union environmental regulation (EC No. 1907/2006) hereafter referred as REACH, SNA Europe is operating in accordance with the REACH legislation and keeps under review of the Candidate List as produced and updated by ECHA. SNA Europe is also in compliance with EU Regulation (2017/1000) of June 2017 amending Annex XVII to REACH Regulation (1907/2006) as regards perfluorooctanoic acid (PFOA) Regulation EU 2020/784 dated April 8, 2020, its salts and PFOA-related substances and confirms that its products do not contain PFOA, its salts and PFOA-related compounds.

Under the structure of the REACH regulation, SNA Europe is a manufacturer of “**ARTICLES**” to our EU customers. We do not manufacture “substances” or “preparations” and our articles do not involve the “intentional release of substances”.

**SCIP** (Substances of Concern In Products/articles) is the database for information established under the **Waste Framework Directive** (WFD) of the articles containing substances of very high concern (SVHCs) on the Candidate List in a concentration above 0.1% weight by weight (w/w) placed on the EU market. Companies have to submit information of these articles to ECHA, as of 5 January 2021. Due to the fact, SVHCs in our products, apart from the traces are below the limit of 0.1% weight by weight, we are not obliged to notify ECHA.

Please accept this letter as fulfillment of supplier obligation under Article 33 of REACH regulation. For any additional information, please contact undersigned.

Sincerely,

Vitor Casanova  
Strategic Sourcing Director
