

Mannheim, February 2023

In response to your inquiry regarding Annex XVII of REGULATION (EC) No 1907/2006 (REACH) and REGULATION (EU) 2019/1021 (POP)

Pepperl+Fuchs supports the aims of the European Environmental Regulation, in particular the improvement of the health and safety of citizens and the promotion of environmental conservation.

Products are developed and manufactured at Pepperl+Fuchs in compliance with the relevant regulations. Electronic and electrical equipment supplied to our customers to the best of our current knowledge does not contain any substance whose placing on the market is prohibited by

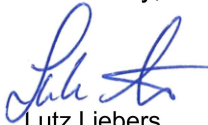

- EC 1907/2006 REACH Annex XVII or
- EU 2019/1021 on Persistent Organic Pollutants (POP) amended by EU 2020/784 (PFOA).

We are in constant contact with our suppliers in this regard in order to take into account the regular changes and adoptions of these regulations. However, as our large product range includes an enormous variety of electronic components, a brief analysis of the materials contained in the products is difficult.

It goes without saying that Pepperl+Fuchs is responsible for ensuring that all legal requirements for occupational safety and environmental protection are observed during production. We design our products in such a way that, according to the current state of our knowledge, no health hazards for the user and no hazards to the environment are to be expected when they are used properly and in accordance with their intended use.

The information we have provided reflects the current state of knowledge and technology at Pepperl+Fuchs. Our information is not to be interpreted as a guarantee of a specific product property within the context of the statutory warranty regulations.

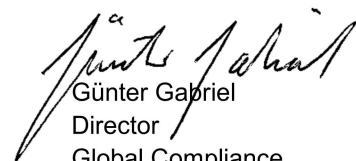

Yours truly,

Lutz Liebers
