

Declaration of SVHC / REACH Conformity

To be more responsible for minimizing the use of the hazardous materials that have impacted on the Earth, we, PLANET Technology Corporation (PLANET) hereby confirms, to date, based on the feedback from our suppliers, our products shipped to the EU territory have complied with the restriction of SVHC (Substances of Very High Concern) in Regulation (EC) 1907/2006 (REACH – Registration, Evaluation, Authorization, and Restriction of Chemicals) identified by ECHA (European Chemical Agency).

PLANET's products are considered articles as defined in REACH. These products/articles under normal and reasonable conditions of use do not have intended release of substances. Therefore the requirement in REACH for registration of substances contained in these products/articles does not apply.

PLANET is not a candidate for product/articles that contain any of the Substances of Very High Concern (SVHC) as listed above the regulatory threshold of 0.1% in our products/articles nor does PLANET's tonnage exceed 1 ton per year per importer. Therefore, the requirement in REACH to notify ECHA of products/articles exceeding these limits is not applicable.

PLANET will continuously review the ECHA candidate list for additions and updates, and act accordingly in compliance with REACH regulations. In the extremely unlikely situation that a PLANET product is found to contain more than 1000ppm of SVHC by weight, PLANET will notify the authorities and recipients of the procedures required under REACH legislation. PLANET has put all its efforts in eliminating SVHC in its products by redesigning its overall sourcing of materials and production processes.

For further information on the SVHC list, please refer to European Chemicals Agency web site:

<https://echa.europa.eu/candidate-list-table>

Additional information on the European Union 's REACH regulation can be found:
