 **LASCAR**  
electronics

## WHERE'S MY CD?

Lascar's EL-WIN-USB control software will no longer be supplied on a mini-CD with your data logger.

Instead we ask that you visit [www.easylogusb.com](http://www.easylogusb.com) to download the software. As well as reducing waste, this will help to ensure you have the latest software version to make the most of your EasyLog USB data logger.

If you require a CD copy, please contact your local Lascar office and we'll be happy to arrange for a CD containing the latest software to be sent to you free-of-charge.

Visit [www.easylogusb.com](http://www.easylogusb.com)

NOW for the latest software from Lascar Electronics
