Section I – Information of Manufacturer					
Manufacturer's Name GPI International Ltd.	Emergency Telephone Number				
Address (Number, Street, City State, and ZIP Code) 7/F, Building 16W, 16 Science Park West Avenue Hong Kong Science Park,	Telephone Number for information 852-2484-3333				
New Territories, Hong Kong	Date of prepared and revision				
Issue Date Jan 01,2020	Signature of Preparer (optional)				

Section II - Hazardous Ingredients / Identity Information

Description:	Approximate % of total weight		CAS No.	Remarks
Mercury (Hg)	<1.0	ppm	7439-97-6	Impurity
Lead (Pb)	<1000	ppm	7439-92-1	Added in Zinc plate
Cadmium (Cd)	<10	ppm	7440-43-9	Impurity
Hexavalent Chromium (Cr ⁶⁺)	<10	ppm	7440-47-3	Impurity
Polybrominated Biphenyls (PBBs)	N/A		\	
Polybrominated Diphenyl Ethers (PBDEs)	N/A		\	
Zinc Chloride (ZnCl ₂)	2-10	Wt%	7646-85-7	
Ammonium Chloride (NH ₄ Cl)	0-10	Wt%	2125-02-9	
Manganese Dioxide (MnO ₂)	25-35	Wt%	1313-13-9	
Zinc (Zn)	10-20	Wt%	7440-66-6	
Acetylene Black	5-15	Wt%	1333-86-4

GP Batteries

Safety Data Sheet

Model No.: GN1604S

Document N	umber: GPE	BC-MS-S001		Revisio	on:05		Page 2 of 4
Section V	– Reactivit	v Data					
Stability	Unstable		Conditions	s to Avoid			
	Stable	X					
Incompatibility (Materials to Avoid	1)					
Hazardous Deco	mposition or Bypr	oducts					
Hazardous	May Occur		Condition	s to Avoid			
Polymerization	Way occar		Condition	3 to 71 void			
	Will Not Occur	X					
	- Health H	azard Data					
Route(s) of		Inhalation?		Skin?		Ingestion?	
Entry			N.A	•		N.A.	N.A.
Health Hazar	d (Acute and C	Chronic) / Toxic	logical ir	nformation			
In case	of electrolyte leaka	ige, skin will be itch	y when co	ontaminated with elec-	trolyte.		
In conta	ct with electrolyte	can cause severe in	ritation and	d chemical burns.			
Inhalatio	on of electrolyte va	apors may cause irri	tation of th	ne upper respiratory to	ract and l	ungs.	
Section VI	I – First Aid	d Measures					
First Aid Pro	cedures						
If electr	If electrolyte leakage occurs and makes contact with skin, wash with plenty of water immediately.						
If electr	If electrolyte comes into contact with eyes, wash with copious amounts of water for fifteen (15) minutes, and contact a physician.						
If electrolyte vapors are inhaled, provide fresh air and seek medical attention if respiratory irritation develops. Ventilate the contaminated area.							
Section VIII - Fire and Explosion Hazard Data							
Flash Point (Met	hod Used)	Ignition Temp.]	Flammable Limits	I	EL	UEL
	A.	N.A.		N.A.		N.A.	N.A.
Extinguishing Media							
Carbon Dioxide, Dry Chemical or Foam extinguishers							
Special Fire Fighting Procedures							
N.A.							
Unusual Fire and Explosion Hazards							
Do not dispose of battery in fire - may explode.							
Do not s	short-circuit batter	y - may cause burns	Do not short-circuit battery - may cause burns.

Section IX – Accidental Release or Spillage

Steps to Be Taken in Case Material is Released or Spilled

Batteries that are leakage should be handled with rubber gloves.

Avoid direct contact with electrolyte.

Wear protective clothing and a positive pressure Self-Contained Breathing Apparatus (SCBA).

Section X – Handling and Storage

Safe handling and storage advice

Batteries should be handled and stored carefully to avoid short circuits.

Do not store in disorderly fashion, or allow metal objects to be mixed with stored batteries.

Never disassemble a battery.

Do not breathe cell vapors or touch internal material with bare hands.

Keep batteries between -30°C and 35°C for prolong storage.

Section XI – Exposure Controls / Person Protection

Engineering Control

No engineering measure is necessary during normal use. If internal cell materials are leaked, the information below will be useful.

Exposure Control Limit

Common Chemical Name /	OSHA PEL	ACGIH TLV
General Name		
Manganese compounds	(Celling) 5 mg/m ³	TWA 0.02 mg/m³ (resp.)
(as Mn)		
Nickel, metal and insoluble	(as Ni) TWA 1 mg/m ³	Elemental: 1.5mg/m³ (IHL);
compounds		Insoluble inorganic compounds:
		0.2mg/m³ (IHL)
Zinc oxide	Respirable fraction:	Respirable fraction:
	5 mg/m ³	2 mg/m ³
Graphite	Respirable fraction:	2 mg/m³ (all
	5 mg/m ³	forms except fibers)
Carbon black	3.5 mg/m ³	3.5 mg/m³ (IHL)
TWA – Time Weighted Average ACGIH TIV: American Conference of Governmental OSHA PEL: Occupational Safety & Health Administr		

Section XII - Ecological Information

N.A

Safety Data Sheet

Model No.: GN1604S

Document Number: GPBC-MS-S001 Revision:05 Page 4 of 4

Section XIII - Disposal Method

Dispose of batteries according to government regulations.

Section XIV – Transportation Information

GP primary carbon zinc cylindrical cells/batteries are considered to be "dry cell" batteries and are unregulated for purposes of transportation by the U.S. Department of Transportation (DOT), International Civic Aviation Administration (ICAO), International Air Transport Association (IATA), the International Maritime Organization (IMO). (Carbon zinc batteries are not regulated for transportation as "DANGEROUS GOODS" under the IATA Dangerous Goods Regulations 61th edition 2020.)

IATA DGR: Special Provision A123: "Example of such batteries are: akali-manganese, zinc carbon. and nickel-cadmium batteries. Any electrical battery...having the potential of a dangerous evolution of heat must be prepared for transport as to prevent (a) a short-circuit (e.g. in the case of batteries, by the effective insulation of exposed terminals.) is forbidden from transport; and (b) accidental activation. The words "Not Restricted" and the Special Provision number must be included in the description of the substance on the Air Waybill as required by 8.2.6 when an Air Waybill is issued.

EU: As primary carbon zinc cells/batteries are not explicitly mentioned in RID/ADR, there are no special Dangerous Goods shipment requirements for these products.

USA: 49 CFR § 172.102 Special Provision 130: "For other than dry battery specifically covered by another entry in the § 172.101 Table, "Batteries, dry" are not subject to the requirements of this subchapter when they are securely packaged and offered for transportation in a manner that prevents the dangerous evolution of heat (for example, by the effective insulation of exposed terminals) and protects against short circuits."

Section XV – Regulatory Information

Special requirement be according to the local regulatories.

Section XVI - Other Information

The data in this Material Safety Data Sheet relates only to the specific material designated herein.

Section XVII - Measures for fire extinction

In case of fire, it is permissible to use any class of extinguishing medium on these batteries or their packing material. Cool exterior of batteries if exposed to fire to prevent rupture.

Fire fighters should wear self-contained breathing apparatus.
