Pilot Lamp

Product Overview

This series pilot lamp only use LED lamp as the light source. The advantage have: long life, gentle weight, smalbcubag, save energy. It is the advanced product of all kinds of the incandescence lamp and the neon lamp of the XD type. The cover of the lamp is made of PC material, and have good shock resistance. It can be used as indication pilot light, accident signal and other signals in the circuits of such equipment as telecommunication.

Specifications

- Sectorial Life≥30000 hours
- Permitted Voltage ± 20% (≥110V)
- O Dielectric Strength: 2.5kV(AC RMS), 1 min
- Our State State
- Rated Operating Current:≤20mA
- In Brightness:≥100cd/m2
- Ocomparative Tracking Index CT1≥100, flame retardant
- Insulation Resistance: Ui≤60V,5MΩ:60V < Ui≤660V,50MΩ</p>
- Light Color: red, green, yellow, white, blue, orange
- ◎ Operating Temperature: 25° C ~ 55° C

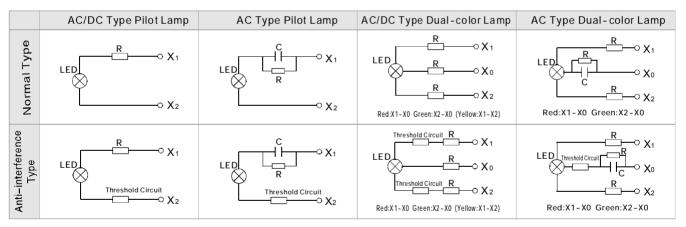

Diagram of Interior Connection

Note:1, AC/DC type pilot lamp is resistor step - down form; AC type pilot lamp is capacitor step - down form.

2, When voltage is 110V or above it, The temperature of outer shell of AC/DC type pilot lamp is higher than AC type pilot lamp.

Attentions

1, The frequency of AC type pilot lamp is 50 \sim 60Hz. If work in other frequency ranges, it will be broken .

 $\label{eq:2.1} 2, The \ common \ threshold \ value \ of \ anti-interference \ pilot \ lamp \ is \ below \ 40V; \ and \ if \ you \ need \ higher \ threshold \ value \ please \ tell \ us.$

If you need to weld, please finish it in 3 seconds by the electric iron which is below 30W and don't exert external force on terminals. We suggest that the threshold value shouldn't be too high. Please check the routing If the interference voltage is too high.

 $\label{eq:connection} \ensuremath{\mathsf{s}}\xspace{\mathsf{s}}\xs$

4, Avoid using welding mode to connect lines as possible and you should using general plug $(2.5 \times 0.8 \text{ mm})$ to connect and wear the protective sleeve.
