B085 - Parabolic-microphone

This highly sensitive microphone is able to receive after being fitted in a half-ball-shaped reflector (eg. a divided play ball) noises and words from more than some hundred meters. Ideal for observing animals, for detectives etc.
Fitting case: G085 - Standard wall case

Technical Data:

Acoustic sensor: high-sensitive FET capacitor microphone
Sensitivity: adjustable
For headphone connection: 8 - 32 ohm
Operating voltage: 9 V/DC
Power consumption: max. approx. 230 mA
Size of board: approx. 56 x 56 mm
