1. Safety Instructions and Safeguarding

1.1. Installation note

An external mains adapter is required for the electrical supply of the controller EPH 460. If this mains adapter is itself supplied with a voltage >50V DC or >75V AC the following points have to be considered:

The unit should only be installed by qualified specialist personnel. Installation and operation of the unit should comply with the local regulations for electrical installations as well as health and safety regulations. The protection of people and property must be warranted by applying the currently applicable safety regulations (VDE, electrical safety regulations, IEC, etc.). High start-up currents can occur at the moment of tuning on a controller device / mains adapter due to charging process of the intermediate circuit. An effective safeguard is therefore required on the mains input side (e.g. a C-Rated 16A line circuit breaker). The use of RCD circuit breakers before control unit / mains adapter is not recommended because of the leakage currents generated by EMC interference suppressing devices. The regulator card / mains adapter must not be operated without an effective connection to earth! The connection to earth must comply with local regulations.

1.2. ESD-Protection / Hazard note

Attention during installation of the electronic board!	Danger to burn - Beware!	Danger to fire- Beware!	Danger to life-Beware!
It must be warranted on your part that there is sufficient ESD-protection.	Parts of this controller card can be reach a temperature up to 80°C. Increased risk at controller cards without protective cover.	Unprofessional handling and installation can cause a fire.	Parts of this controller card are under intermediate circuit voltage and remain energised >50VAC respectively 75VDC after turning main power off. Coming into contact with the terminals, lines and unit parts can cause serious injuries or result in death!

2. <u>Getting started DLS24/xx-460 with 6/4-pole screw terminal block</u>

- 1. Select modes:
 - put jumper 1 on 1-2 for internal speed reference (potentiometer 1) or on 2-3 for external speed reference.
 - put jumper 2 on 1-2 for 12V motor or on 2-3 for 24V motor.
 - put jumper 3 on 1-2 for speed reference max. 5V or on 2-3 for 10V target value input.
 - put jumper 4 on 1-2 for internal controller enable or 2-3 for external controller enable (terminal 4).
- 2. Turn potentiometer 2 (Imax) for current limitation to right position.
- 3. Turn potentiometer 3 (IxR) compensation to left position.
- 4. Connection of the control wires see connection diagram, page 7.
- 5. Connect DC motor to terminals 7 and 8.
- Connect power supply: to terminal 9 GND, to terminal 10 plus (approx. 12 36 V DC).
- 7. Now turn on power supply.
- 8. LED green (power on) illuminates on the pcb.
- 9. With potentiometer 1 (n ref) the speed reference can be adjust from 0 to 100%, if jumper 1 is put on 1-2.

3. <u>Technical features</u>

- Power supply Ue: 12V DC 36V DC
- High frequency f>20 kHz, this results in low-noise operation
- Electric connection via spring clamp terminals
- High level of effectiveness by using Power Mosfets
- Mounting: mounted with screws or on a 35mm mounting rail

The dispose of this product has to be done via separate electrical- and electronic equipment disposal.

4. Technical data

Туре	Supply voltage	Armature voltage U _A	Armature current I _N	Mechanical power P _{ab}
	Supply vollage	UA		Гab

5. <u>Connecting</u>

5.1. Control connections

Speed reference value:	Terminal 1: GND Terminal 2: wiper external potentiometer (10kOhm) Terminal 3: 5V DC
Controller enable (RF):	Terminal 4: Input 10-36V DC H/active
U _{E2} :	Terminal 5: Output (12-36V DC, <50mA) e.g. for external switch for controller enable
Ready for operation (BTB):	Terminal 6: digital output (12-36V DC, <50mA)

6. <u>CE Declaration of Conformity</u>

The manufacturer

EPH elektronik Produktions- und Handelsgesellschaft mbH Rudolf-Diesel-Straße 18 DE-74354 Besigheim-Ottmarsheim Tel.: +49(0)7143/81 52 - 0

herewith declares that the product:

Product:	1-Q Transistor Controller digital
Туре	DLS 24/10/x – 460
	DLS 24/20/x – 460

is conform to the mentioned EC-regulation in connection with the test peripheral devices:

Regulation 2014/30/EU – EMC-directive

The following harmonised standards are applied:

DIN EN 61000-6-4:2007 +A1:2011	EMI emission
DIN EN 61000-6-2 VDE 0839-6-2:2006-03	EMI immunity

The transistor controller's conformity to the mentioned standards doesn't concern for the complete system. An extra EMC-test would be necessary to get the conformity for the complete system.

If the transistor controller is integrated in a machine, the machine has to comply with regulation 2006/42/EG (machines directive). If not, operating is not allowed. If the supply voltage of the machine is > 50V AC respectively 75V DC, the regulation 2014/35/EC (low voltage directive) is to be observed.
