

roam wild... go solar

On location, on safari, up a mountain or simply on the move, solargorilla gives you power anywhere under the sun. solargorilla's 20 volt and 5 volt USB socket make it the ultimate renewable powerstation for your notebook, cellphone, iPod and many more devices.

solargorilla

- compact & portable high energy
- robust solar panel
- charge the powergorilla directly from the sun
- power your notebook/laptop
- charge your cellphone and other handheld devices

How does it work?

The PV (photovoltaic) solar panels generate electricity by the Photovoltaic Effect; producing electric current when they are exposed to the light.

Simply open the 2 panels and expose to direct sunlight to put your solargorilla to work. The technically advanced solid panels ensure superb power and reliable performance, in a tough casing that's ready to travel.

The green LED indicates the strength of charge. Performance of solargorilla will vary according to levels of sunlight and device being powered.

Compatible with:

Most notebooks, iPod, iPhone, PDAs, MP3/MP4, handheld games consoles, Sat Navs, Nokia, Mini Nokia, Motorola, Samsung, LG & Sony Ericsson and many standard cellphones.

Other tips are available for most hand-held devices not mentioned above and can be purchased from: www.powertraveller.com

Output capacity

20v @ 500mA max
USB 5v @ 1000mA max

Designed and developed in the UK

Engineered and made in China
