The wording of the listed risk phrases refer to section 16. **SECTION 4: First aid measures** · 4.1 Description of first aid measures · General information Remove contaminated, saturated clothing immediately. · After inhalation Supply fresh air. If required, provide artificial respiration. Keep patient warm. Consult doctor if symptoms persist. In case of unconsciousness bring patient into stable side position for transport. · After skin contact Instantly wash with water and soap and rinse thoroughly. If skin irritation continues, consult a doctor. · After eye contact Rinse opened eye for several minutes under running water. If symptoms persist, consult doctor. · After swallowing Do not induce vomiting; instantly call for medical help. SECTION 5: Firefighting measures 5.1 Extinguishing media • Suitable extinguishing agents CO2, sand, extinguishing powder. Do not use water. · For safety reasons unsuitable extinguishing agents Water. 5.2 Special hazards arising from the substance or mixture Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazards. (Contd. on page 4) GB

Do not allow run-off from fire fighting to enter drains or water courses. SECTION 6: Accidental release measures · 6.1 Personal precautions, protective equipment and emergency procedures Remove all sources of ignition. Provide adequate ventilation. Refer to protective measurer, listed in sections 7 and 8. · 6.2 Environmental precautions: Do not allow product to enter into sewerage systems or water bodies. Inform respective authorities in case of product reaches water or sewage systems. · 6.3 Methods and material for containment and cleaning up: Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). · 6.4 Reference to other sections See Section 7 for information on safe handling See Section 8 for information on personal protection equipment. See Section 13 for information on disposal. SECTION 7: Handling and storage · 7.1 Precautions for safe handling Ensure good ventilation/exhaustion at working place. Keep containers tightly sealed. · Information about protection against explosions and fires: Protect against electrostatic charges. Keep ignition sources away - Do not smoke. Vapours are heavier than air and may spread along floors. Vapours may from explosive mixture with air. 7.2 Conditions for safe storage, including any incompatibilities · Storage · Requirements to be met by warehouses and containers: Store only in the original container. Information about storage in one common storage facility: Keep away from foodstuffs, beverages and food. · Further information about storage conditions: Protect from heat and direct sunlight. Storage class 3 · 7.3 Specific end use(s) No further relevant information available. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. · Individual protection measures, such as personal protective equipment · General protective and hygienic measures Instantly remove any spoiled and impregnated garments. After skin contact clean with water and soap or use appropriate detergents . Do not use organic solvent. Keep away from foodstuffs, beverages and food. · Breathing equipment: In case of brief exposure or low pollution use breathing filter apparatus. In case of intensive or longer exposure use breathing apparatus, independent of circulating air. Filter A/P2. Hand protection The instructions and information provided by the glove manfacturer on use, storage, maintenance and replacement must be followed. #### • Other observations:

Exposure to component solvents vapours concentration in excess of the stated occupational exposure limit may result in adverse health effect such as mucous membrane and respiratory system irritation and adverse effect on kidney, liver and central nervous system.

Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases, loss of consciousness.

Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in non-allergic contact dermatitis and absorption through the skin. Repeated or prolonged skin contact may lead to allergic contact dermatitis.

The liquid splashed in the eyes may cause irritation and reversible damage.
