Parrot MINIKIT+ Portable Bluetooth hands-free kit

The Parrot MINIKIT+ is a very easy-to-use hands-free Bluetooth kit that integrates advanced phone functions: you can make and receive calls while driving, and still keep your eyes on the road and your hands on the wheel. Its refined shape and monochrome design – ranging from matte to glossy black – make it a truly modern device which will find its place in the interior of any car.

TWO TELEPHONES MAY BE CONNECTED

The Parrot MINIKIT+ includes the Parrot Dual Mode multipoint technology. You may simultaneously connect two Bluetooth telephones and easily receive incoming calls on either phone. The kit signals incoming calls using different ring tones, letting you know which telephone is receiving the call.

NAVIGATION INSTRUCTIONS AND MUSIC VIA YOUR KIT

Thanks to the Bluetooth A2DP audio profile, you can listen to navigation instructions or your music directly from the Parrot MINIKIT+. When you receive a call, the music or navigation instructions are interrupted automatically and then resumed when you end your call*.

YOUR CALLS ARE TRULY HANDS-FREE

Synchronization with your phonebook will start automatically the first time you use the Parrot MINIKIT+ so you have direct access to all your contacts. To place a call, start the voice recognition function by pressing the green button and then say the name of the contact. The Parrot MINIKIT+ recognizes all voices! If you wish to find a last name, a first name or a nickname, browse through your directory and listen to your kit read the names of all your contacts, then validate with a single click to place the call. Receiving calls is also very simple; during an incoming call, the Parrot MINIKIT+ says the name of the calling party; you may then say "accept" or "refuse" when prompted by the Parrot MINIKIT+.

SUPER EASY TO INSTALL AND USE

The Parrot MINIKIT+'s vibration sensor will switch it into 'on' mode and automatically connect it to your cell phone as soon as you enter your vehicle. It also comes with an elastic strap which is easily reversible whether you have your sun visor down or up.

The Parrot MINIKIT+ interface was created with simplicity in mind. You can browse through the menus using the knob, validate with the green button or cancel the action by simply pressing the red button.
