P16 MECHANICAL SPECIFICATION

- Operating Torque: 0.4 - 1.5 cN.m
- Permissible Axial Spindle Load: 50 N (5 Sec. maximum)
- Permissible Torque at End Stop: 35 cN.m
- Rotation angle, without a switch: $270^\circ \pm 5^\circ$
- Rotation angle, with a switch: $300^\circ \pm 5^\circ$
- Click Stop (indent) facility available on certain models

P16 angle of rotation - without and with a rotary switch

In the diagrams above **WITHOUT** switch is on the LEFT; **WITH** switch is on the RIGHT; and the potentiometer terminals are marked A, S and E.

- A = Initial termination
- S = Wiper (or moving contact) termination
- E = End termination

ELECTRICAL SPECIFICATION - UNIQUE TO P16 POTENTIOMETERS

Effective rotation:

- With or without rotary switch: 232° nominal

Rated Power Dissipation @ 40°C for P16 potentiometers:

- 0.25W linear law
- 0.12W non linear law

ECO, P16 power dissipating curve

Limiting Element Voltage: 350 V DC for P16 potentiometers

ECO, P16 maximum working voltage curve

Insulating Voltage: 500 V AC for P16 potentiometers

ELECTRICAL SPECIFICATION - COMMON TO ECO, P16 AND P20 POTENTIOMETERS

Conductive polymer (plastic) track (over twice the life of carbon tracks)

Life Expectancy of >20,000 cycles (tested at 30 times per minute)

Insulation Resistance: ≥ 4 Gohms

Rated Resistance: E3 Series

- Optional: E6 Series
- Linear Law: 1K - 1M
- Non linear Law: 4K7 - 470K

Tolerance on Rated Resistance: ± 20%

- Optional Tolerance on 1K - 1M: ± 10%

Resistance Laws (Taper):

- Linear: A
- Non linear: B (Audio/Log) or C (Reverse Audio/Anti Log)
- Other laws: Please refer to Sales office

Linearity

As a basis of assessing Linearity Tolerance the independent method is the most practical, permitting as it does, the reference curve to be aligned as near as possible to the actual output curve. This avoids the use of the theoretical starting and finishing points, it is normal for the customer to realign the achieved curve with series trimmers at each end of the device if required.

Linearity Tolerance is 4% over the Nominal Resistance range of 1K0 to 1M0. The Linearity Tolerance is measured on at least 70% of the effective rotation range.

Note. In the case of Terminal and Zero-based linearity, both present constraints which increase the manufacturing difficulty and in consequence have an adverse effect on the product's price and availability.

Potentiometer linearity

Matching Tolerance (For Tandem Stereo Potentiometers)

Tandem Potentiometers have two identical resistor units with the same variation law. The mismatching of the two resistor units, expressed in dB, is measured by the difference between the attenuations introduced by each resistor unit at various points of travel.

- Law A: 4 dB at Attenuation range 0 - 20 dB
- Law B and C: 3 dB at Attenuation range 0 - 20 dB

Matching tolerance for stereo

LAW	ATTENUATION RANGE	MATCHING TOLERANCE *
A	0 - 20dB	4dB
B & C	0 - 20dB	3dB

*Matching Tolerance = $20 \text{ Log } \frac{V1}{V2}$

Operating Temperature: -25°C to +70°C

Temperature derating curve

Temperature Coefficient of Resistance: +300 -500 ppm

P16 BASIC DIMENSIONS

In the diagram below the potentiometer terminals are marked A, S and E.

- A = Initial termination
- S = Wiper (or moving contact) termination
- E = End termination

P16 BUSH OPTIONS

The P16 bushes are available in metal or nylon; with an M7 or M10 thread; and without a locating feature:

- Diecast Zinc Alloy
 - M10 x0.75mm pitch (Type C)
 - M7 x0.75mm pitch (Type CG)
- Glass Filled Nylon
 - M10 x0.75mm pitch (Type CP)

Do not attempt to prevent any unwanted body rotation by overtightening the retaining nut, since this can cause thread damage, distortion, change of electrical resistance and restrict shaft rotation. BS9130:1972 provides further details on this topic. The *recommended torque* for tightening the retaining nut is 45cN.m and this can be achieved cost effectively by using a Torque Limiting device as shown on our [Accessories](#) page.

P16 SPINDLE OPTIONS

The P16 spindles are plastic, unless otherwise stated, fixed i.e. not removable and they are available in three diameters:

- 6.0mm Diameter
 - Cylindrical (Type F1)
 - 4.0 x 12mm Flat (Type F2)
 - 5.0 x 15mm Flat (Type F3)
 - 5.0 x 10mm Flat (Type F4)
 - 4.6mm x 15mm Flat (Type F11)
- 4.0mm Diameter
 - 3.0 x 8.5mm Flat (Type F22)
 - 3.0 x 8.5mm Flat (Type M22 - Metal)
- 6.35mm Diameter
 - Cylindrical (Type F41)
 - 5.5 x 10mm Flat (Type F42)
 - 5.5 x 15mm Flat (Type F43)
- Splined Spindle - 6.0mm dia. 18 teeth
- Dual Concentric
 - Flatted/Slotted (Type M15 - Metal)
 - Cylindrical (Type M16 - Metal)

OMEG POTENTIOMETER CODING

The model type given to our potentiometers is explained on this page and covers both unswitched and switch potentiometers. Please note that not all options are available in each potentiometer range.

A unique code, or part number that specifies all the parameters of the potentiometer down to the specific spindle, is not used due to the bespoke nature of our business, please return to your previous page where you will find links to an enquiry form for your use.

The format is *POTENTIOMETER CODE (/SWITCH CODE)* where the switch code is only added if appropriate.

POTENTIOMETER CODE

The potentiometer code is in three parts:

- Prefix (Potentiometer terminals)
 - BR - Bracket (included with printed circuit terminals)
 - FN - Faston (or spade)
 - LA - Long bent and away from the spindle
 - LT - Long bent and towards the spindle
 - OW - Ordinary wiring (eyelets) - *recommended for hand soldering of wires*
 - PC - Printed circuit
 - XA - Extra long, bent away from the spindle (mainly used with switches)
- Body (Potentiometer quantity and style)
 - 2C . . - Dual (stereo) with inner and outer spindles
 - 2G . . - Dual (stereo) with one spindle
 - 3C . . - Triple (three gang) with inner and outer spindles
 - 3G . . - Triple (three gang) with one spindle
 - 4G . . - Quadruple (four gang) with one spindle
 - . . 16 - Single, 16mm size (P16) or 17mm size (ECO)
 - . . 20 - Single, 20mm size
- Suffix (Potentiometer fixing)
 - BU - Bush
 - ECO - Plastic bush housing (exclusive to the ECO potentiometer range)
 - SP - Plate without tags
 - ST - Plate with tags
 - TT - Plate with twist tabs

Note: A bracket fixing is an additional item and defined in the 'Potentiometer terminals' section above.

SWITCH CODE

The switch code is dependent on the switch body that is fitted and will be preceded with a slash (/).

ROTARY SWITCH

- Switch current rating
 - B1 - Certified and rated 1Amp
 - B4 - Certified and rated 4Amps
 - N4 - *NOT* certified and rated 4Amps
- Switch terminals
 - OW - Ordinary wiring (eyelets) - *recommended for hand soldering of wires*
 - PC - Printed circuit
- Switch contacts
 - 1S - One pole, on off (single pole, single throw SPST)
 - 1S'CH' - One pole, changeover (single pole, double throw SPDT)
 - 2S - Two poles, on off (double pole, single throw DPST)
 - 2S'CH' - Two poles, changeover (double pole, double throw SPDT)
