ALUMINUM ELECTROLYTIC CAPACITOR SPECIFICATIONS

SERIES	HT	Reference standard	JIS C5141
---------------	-----------	--------------------	------------------

1. Scope

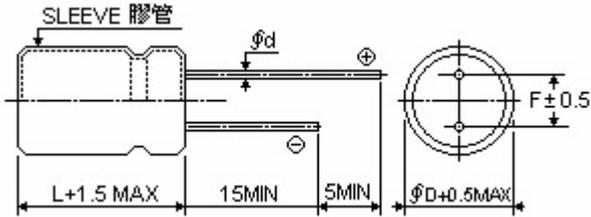

This specification applies to aluminum electrolytic capacitor, used in electronic equipment.

Type : Radial

2. Electrical characteristics

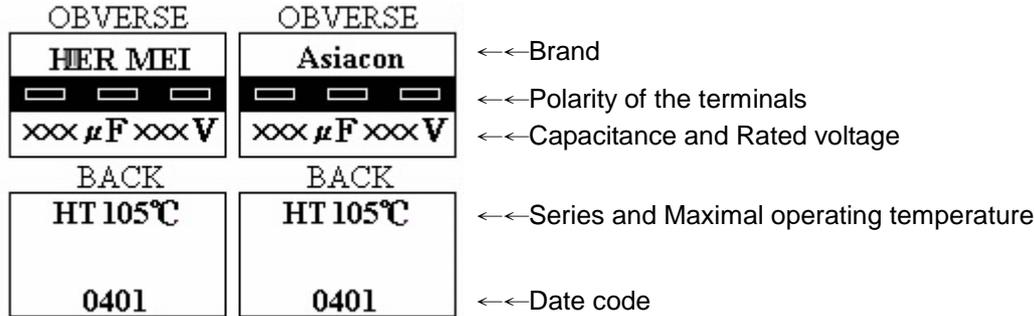

(A) Operating temperature range	: 6.3~250V : - 40 ~ +105°C	350~450V : -25 ~ +105°C
(B) Capacitance tolerance	: ±20%(M) 25°C 120Hz	
(C) Capacitance (CAP)	: 0.1 μF ~ 15000 μF	
(D) Rated working voltage (WV)	: DC 6.3 ~ 450V	
(E) Surge voltage (SV)	: Values in Table 1 (P.4)	
(F) Leakage current (LC)	: Values in Table 2 (P.4) or less	
(G) Dissipation Factor (DF, tan δ)	: Values in Table 3 (P.4) or less	
(H) Low temperature stability	: Values in Table 4 (P.4) or less	

3. Dimensions and materials

φD	5	6.3	8	10	13	16	18	20	22
φd	0.5		0.6		0.8				
F	2.0	2.5	3.5	5.0		7.5		10	
8×20 φd=0.6 13×31,13×36 φd=0.8									

4. Marking

5. Load life test

After life test with rated ripple current at conditions stated in the table below, the capacitors shall meet the following requirements.

Capacitance Change	Within ±20% of the initial value
Dissipation Factor	Not more than 200% of the specified value
Leakage Current	Not more than the specified value
Life Time	2000hrs

6. Shelf life test

After applying no rated voltage for 1000hrs at 105°C, pre-treatment for measurements shall be conducted after application of DC rated voltage for 60 minutes. (Reference Standard JIS C5102 4.4)

The capacitors shall meet the following requirements.

Capacitance Change	Within ±20% of the initial value
Dissipation Factor	Not more than 200% of the specified value
Leakage Current	Not more than the specified value

ALUMINUM ELECTROLYTIC CAPACITOR SPECIFICATIONS

SERIES	HT	Reference standard	JIS C5141
---------------	-----------	--------------------	------------------

7. Low temperature storage test

The capacitor without rated voltage at the lowest operation temperature 16 hours, after two hours in room temperature, should do final measurements, the values are as following :

Capacitance Change	$\leq \pm 10\%$ of initial value
Dissipation Factor	\leq initial specified value
Leakage Current	\leq initial specified value

8. Lead strength

(A) Tensile strength:

φ d	≤ 0.5	0.6	0.8	1.0
Lead(Kg)	0.5	1.0		2.5

The capacitor shall withstand the constant tensile force specified between the body and each lead for 10 seconds without either mechanically or electrically.

(B) Bending strength:

φ d	≤ 0.5	0.6	0.8	1.0
Lead(Kg)	0.25	0.5		1.0

With the capacitor in a vertical position apply the load specified axially to each lead. the capacitor shall be rotated slowly from the vertical to the horizontal position. Back to the vertical position. the 90° in the opposite direction and back the original position. performance of capacitor shall not have changed and leads shall be undamaged.

9. Solderability test

Capacitor lead wire dipping in flux, and then dip in 250°C ± 5°C, solder liquid for 3 seconds, the substance is above the liquid solder 2mm, the dipping lead must be adherent 90% fresh tin at least.

10. Resistance to soldering heat

Put capacitor lead wire to dip 260°C ± 5°C in solder liquor away the body 2mm, after 10 ± 1 seconds taken out, after two hours in room temperature, should do final measurements, the values are following:

Capacitance Change	$\leq \pm 10\%$ of initial value
Dissipation Factor	\leq initial specified value
Leakage Current	\leq initial specified value
Visual	No damage

11. Surge test

The capacitor shall be applied the surge voltage connected with the 1 kΩ resistor in room temperature, and shall be applied the surge voltage 1000 cycle, each for 30 seconds charge and 5 minutes 30 seconds discharge, the final test values should be as following:

Capacitance Change	$\leq \pm 10\%$ of initial value
Dissipation Factor	\leq initial specified value
Leakage Current	\leq initial specified value
Visual	No damage

12. Safety vent

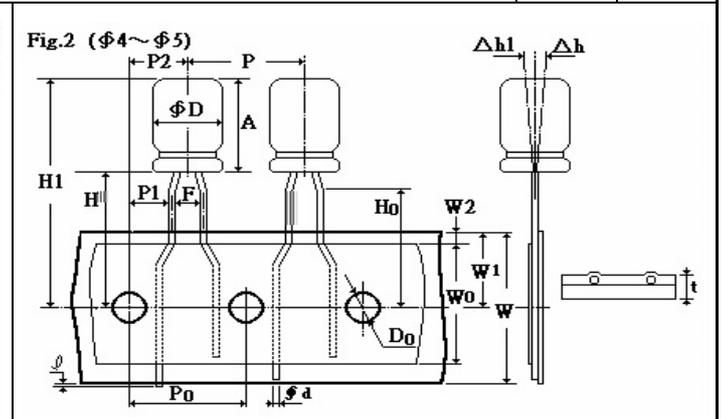

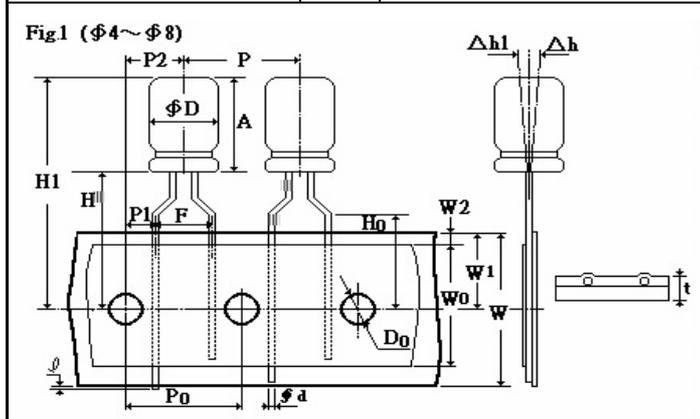

(A) Test condition (DC method)

Reverse voltage shall be applied. then current is as below:

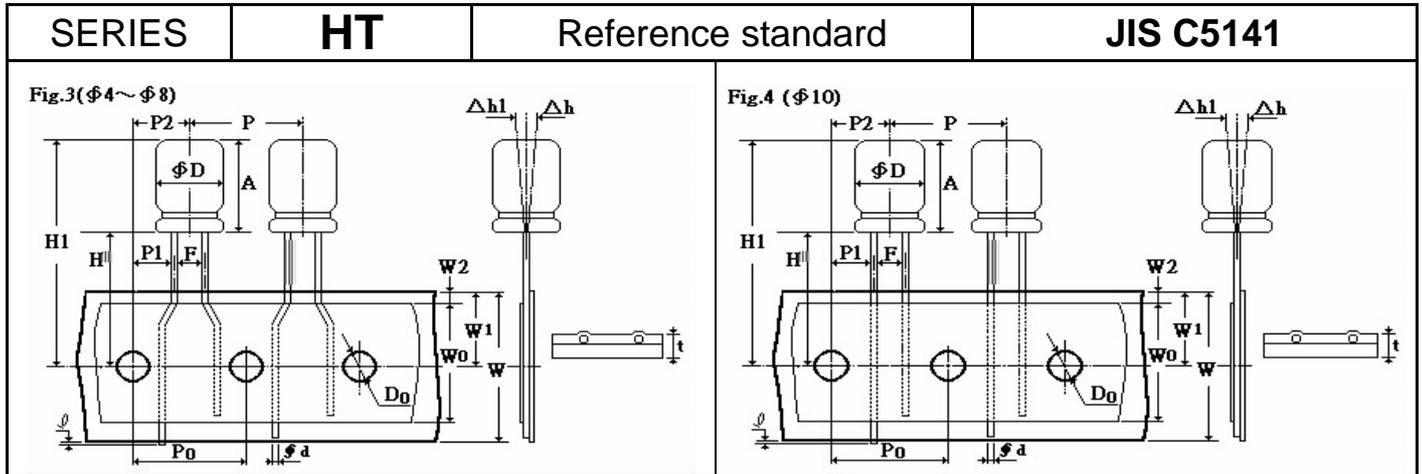

Diameter ≤ 22.4 mm 1 A	Diameter > 22.4 mm 10 A DC.
--------------------------------	----------------------------------
