THE GLOBAL EXPERT
IN **SOLID STATE RELAY**
TECHNOLOGY

ABOUT US

Crydom, a company of Custom Sensors & Technologies (CST) and **global expert in Solid State Relay Technology**, has a distinguished record of providing high quality, world class Solid State Relay and Control Products for a variety of heating, lighting and motion control applications. Crydom products, coupled with **unparalleled technical support, timely delivery and competitive pricing**, provide Crydom's clients with the innovative products and support necessary to succeed in today's competitive and fast paced global markets.

Crydom's extensive selection of standard off-the-shelf products is constantly being updated and expanded through its continuous improvement and aggressive new product development programs. Utilizing state of the art designs, materials and technology, Crydom offers a wide range of AC and DC output SSRs in industry standard Panel Mount, PCB Mount and DIN Rail packages, all **meeting global safety and standards agency requirements** such as CE, RoHS, UL, IEC, etc.

Bolstered by four decades of Solid State Relay operations experience, Crydom also specializes and encourages **adapted and fully custom-designed SSR products** for nearly any application where unique specifications and optimized performance are critical for success.

Crydom's modern purpose-built **100,000 square foot manufacturing facility** houses all aspects of its ISO certified operation including Design and Development Engineering, Manufacturing Operations and Quality Assurance, Customer Service, Finance, Marketing and General Management, permitting close coordination of all aspects of Crydom's activities. Applications Engineering and Sales support are both performed in the field to provide Crydom's Customers with the unparalleled technical and commercial support.

Following rigid design guidelines and standards, Crydom products have set the bench mark for SSR performance and reliability world wide. In addition to **award winning designs**, Crydom has acquired an impressive list of **patents** related to SSRs and Solid State Controls, while continuing to develop new circuit and technology-related inventions as part of **extensive R&D programs**.

To learn more about Crydom SSR technology and products, or how an alliance with Crydom can contribute to the success of your project, visit **www.crydom.com** or contact your authorized Crydom Distributor or Crydom Customer Service Representative today.

DIN RAIL MOUNTED AC & DC OUTPUT SOLID STATE RELAYS

■ **SeriesOne DR Single & Dual Channel SSRs**

Crydom's **SeriesOne DR** Solid State Relays incorporate proprietary thermal management technology resulting in exceptional output ratings of 6 and 12 amps at 40 °C ambient in compact 11 and 18 mm wide DIN rail mounted housings. Ideally suited for heating, lighting or motion control applications where DIN rail space may be limited, the unique design provides both greater power density than previously available in DIN rail mounted Solid State Relays, and greater safety for personnel by eliminating exposed hot metal surfaces typical of SSRs utilizing external heat sinks to attain comparable ratings.

SeriesOne DR SSRs feature all solid state design with optical coupling, AC or DC inputs with LED input status indicator, mounting to standard 35 mm DIN rail, RoHS compliance, CE certification, and UL/cUL recognition including General Use, Motor Controller and 100k cycle endurance ratings.

■ **SeriesOne DR Single Channel Outputs**

SeriesOne DR Single Channel output SSRs incorporate either rugged SCRs for heavy AC industrial loads up to 600 VAC, or power FETs for superior performance with DC loads up to 100 VDC. Single channel models are available with output ratings of either 6 Amps at 40 °C in an 11 mm package, or 12 Amps at 40 °C in an 18 mm wide package. AC output models also offer either zero voltage turn-on for resistive loads or random turn-on for inductive loads. Both AC and DC control voltages are available.

■ **SeriesOne DR Dual Channel Outputs**

SeriesOne DR Dual Channel AC output SSRs also feature SCRs for superior performance. The two independent channels are housed in an 18 mm package with output ratings up to 6 Amps rms per channel at 40 °C, 600 VAC, in zero voltage or random turn-on, and 4 to 32 VDC control voltage.

For more information, technical support or questions about adapted assemblies, contact your local Crydom Distributor or Regional Sales office.

SeriesOne DR Single Channel AC/DC Output

- 6 & 12 Amps output power rating
- 60 & 100 VDC, 24 to 600 VAC operating voltage ratings
- 4-32 VDC, 24, 120 & 230 VAC control input options available
- IP20 housing with unique integrated heat sink design (Patent Pending)
- AC Output versions with Zero Voltage Turn-On for resistive loads and Random Turn-On for inductive loads
- High power density for multiple units
- UL & cUL approved including General Purpose and Motor Controller ratings
- CE & RoHS compliant

OUTPUT SPECIFICATIONS (A)

	DR06x06	DR10x06	DR24x06	DR48x06	DR06x12	DR10x12	DR24x12	DR48x12
Operating Voltage (47-63Hz AC Only)	1-60 VDC	1-100 VDC	24-280 VAC	48-600 VAC	1-60 VDC	1-100 VDC	24-280 VAC	48-600 VAC
General Use Current Rating (B) (Resistive Load)	6 ADC	6 ADC	6 Arms	6 Arms	12 ADC	12 ADC	12 Arms	12 Arms
UL Motor Controller Ratings @ 240 VAC [HP]	N/A	N/A	1/6	1/6	N/A	N/A	1/3	1/3
Min. Load Current	2.5 mA DC	2.5 mA DC	0.15 Arms	0.15 Arms	2.5 mA DC	2.5 mA DC	0.15 Arms	0.15 Arms

GENERAL SPECIFICATIONS (A)

	DRxx06	DRxxx12
Dielectric Strength, Input to Output. AC Output Versions (50/60Hz) [Vrms]	4000	
Dielectric Strength, Input to Output. DC Output Versions [Vrms]	2500	
Dielectric Strength, Input-Output to Case (50/60Hz) [Vrms]	2500	
Minimum Insulation Resistance (@ 500 VDC) [Ohm]	10 ⁹	
Maximum Capacitance, Input/Output [pF]	10	
Ambient Operating Temperature Range [°C]	-30 to 80	
Ambient Storage Temperature Range [°C]	-30 to 125	
Weight (typical) [oz] (gr)	1.76 (50)	3.17 (90)
Housing Material	UL 94 V0 Self-extinguishing	
Input Terminal Wire Capacity	22 AWG minimum, 16 AWG maximum	
Output Terminal Wire Capacity	22 AWG minimum, 14 AWG x 2 or 12 AWG x 1 (standed/solid) maximum	
Maximum Recommended Terminal Screw Torque Input/Output [in/lbs] (Nm)	4.4 (0.5) / 7.0 (0.8)	

GENERAL NOTES

- (A) All parameters at 25°C unless otherwise specified.
 (B) Minimum spacing required between devices (see derating curves).
 (C) Off-State dv/dt test method per EIA/NARM standard RS-443, paragraph 13.11.1.
 (D) Turn-On time for Random-type AC Output is 0.1 ms for DC Control Models and 20 ms for AC Control Models.
 (E) Turn-Off time for AC output versions with AC control is 30 ms.
 (F) Input circuit incorporates active current limitation.
 (G) Not all combinations of ratings are available.
