DC-DC converter, primary switched mode, narrow design, input: 12 -24 V DC, output: 24 V DC / 1 A

Product Description

The DC/DC converter converts a DC voltage of 12 V DC ... 24 V DC to an adjustable, regulated, and electrically isolated 24 V DC output voltage. The DC voltage circuits involved are safely isolated from one another by means of electrical isolation. The "DC-OK" active switching output and an LED are available for signaling. With a design width of just 22.5 mm, the housing is particularly narrow.

Product Features

- Electrical isolation: for setting up independent supply systems
- Support conversion to various voltage levels
- Constant voltage: output voltage regenerated even at the end of long cables
