Self Adhesive Clips
• **SAC with flexible flat design**
• **130100 for Flat Ribbon Cables**

Features and Benefits
The metal 'tongue' of the SAC-series can be bent to suit any shape or configuration of wires or cables. Cost effective with easy application on smooth, clean surfaces.

The self adhesive clip 130100 with integrated clamp can be used for holding flat cables.

Application
These clips are ideal for use in applications which are difficult to access, or for areas where self adhesive is the only possible fixing method (for example 'holes' would be unacceptable). Typically applications include domestic appliances and trailers.

Malleable tongue allows for a variety of sizes per clip.
