A PRCD is a portable RCD with an electronic residual current release and undervoltage release.

- It detects residual currents that occur when a faulty electrical device is touched, for example, and interrupts the current quickly enough to prevent life-threatening accidents.
- It also has an undervoltage release that prevents secondary accidents in the event of a failure of the mains voltage.

- Undervoltage release
- Trigger time less than 30 ms
- Reliable protection against dangerous electric shock
- Residual current is detected in a split second, and the supply of current interrupted
- With function display and trip test button and electronic measuring instrument

## Technical data:

220-240 V~ / 16 A / 50Hz / max. 3.500 W  
Ambient temperature: +40°C / -25°C  
Rated residual current: 30 mA ,  
Trigger time: <30ms  
Weight: ca. 0,2 kg  
Dimensions: 120 / 100 / 60 mm  
EAN: 4011160452307

Tested in accordance with: VDE 0661 / DIN VDE 0620-2-1
