

Packaging contents

- 1x Led projector
- 1x AC/DC home charger
- 1x DC/DC car/truck charger

Specifications

Power:	10 W
Input voltage:	12/24 V DC
Lumen output:	750
Color temp.	6500K +/- 400K
Charging time:	5,0 hours
Battery life:	4,0 hours
Battery:	7,4V/4,4 Ah Li-Ion
Protection class:	IP65

1 General safety instructions

Please read the operating instructions for the LED projector before use! The operating instructions are part of the product. They contain important notes on start-up and handling of the device. Always keep the enclosed operating instructions so as to be able to look up information! They must be enclosed when passing the device on third parties.

2 Safety precautions

The user must observe the safety notes and warnings in order to maintain this status and to ensure safe operation. Please read the operating instructions before startup!

The LED projector may be used outdoors, but avoid contact with extreme temperatures or vibrations, this may cause damage to (the battery of) the projector.

Do not immerse the enclosure into water, since the protection class of this product is IP65 (weather proof).

Never attempt to open the device.

The LED projector cannot be repaired; this part must be immediately disposed in case of a defect.

Ensure sufficient ventilation of the device. Never cover it during operation. Avoid a strong operational demand. Do not install in reach of children or animals. Do not use other than supplied power supplies to charge the projector. The LED projector may only be recharged indoors at temperatures above 0°C.

Any other use of the device than described above can damage the product or endanger the user due to e.g. short-circuits, fire or an electric shock. The entire product may not be modified, adapted, or opened. *These safety notes must be observed in all cases! Any warranty claim is void in the case of damages caused by non-observance of these operating instructions. We are not liable for consequential damages or for damages to property or persons caused by non-observance of the safety notes and improper operation of the device.*

Safe operation is not possible anymore, if:

- the LED projector has visible damages,
- the LED projector does not work anymore

3 Operating instructions

1. Before using the projector for the first time it needs to be fully charged by one of the included chargers. Please connect the AC adapter or DC car adapter to the charge socket at the back of the projector. Then connect the charger to its power source.

Note: the projector needs to be charged indoors, since the chargers itself are not waterproof. Keep the chargers away from humidity. The projector can become warm during the charging process. It's recommended to charge the projector at room temperatures, this to extend battery life.

2. When the charge process is completed (4-6 hours) a green LED indicator will be enlightened. Remove the power supply from the projector and it's power source when the charging process is completed.
3. The projector is ready to use now. It can be switched on/off at the backside of the projector. Avoid direct eye contact with the light source, you risk permanent damage to your eyes. When the battery is low a red LED indicator will flash and the projector will switch off automaticly, the projector needs to be charged.
4. After usage of the projector, it needs to be stored indoors. Avoid storage with extreme high or low temperatures, this will have effect on the battery life of the product.

Note: When the projector is being stored for a long duration (> 6 months) it needs to be recharged meanwhile. This is to prevent deep discharge of the battery.

Notes on Disposal

Old units, marked with the symbol as illustrated, may not be disposed of in the household rubbish. You must take them to a collection point for old units (enquire at your local authority) or the dealer from whom you bought them. These agencies will ensure environmentally friendly disposal.

Care and warranty

Before cleaning the unit, disconnect if necessary from other components; do not use aggressive cleaning agents. The unit has been carefully checked for defects. If nevertheless you do have cause for complaint, please go back to the retailer where you have bought the product together with your proof of purchase. We offer a 2 year warranty from date of purchase. We are not liable for damage arising from incorrect handling, improper use or wear and tear. We reserve the right to make technical modifications.
