## » GardenWatchCam

Every year tens of millions of people love designing, planting and caring for their gardens. Gardening brings many hours of relaxation and enjoyment, and instills a feeling of satisfaction at being able to share this beauty with others. However gardens only last as long as the growing season and only those who visit the garden can enjoy its unique splendor. A gardener may remember to take a photo or two but that doesn't capture the total experience.

The GardenWatchCam does just that by capturing the gardens growth from the first shoots breaking the earth to the graceful surrender of the last petal to cooling nights.

Simple to operate and locate, this camera will take high quality time lapse photos of your garden at predetermined times for months. Not just Gardens...anything that experiences change over time can be captured. Fall Foliage can be captured in all of its brilliance in hourly intervals, ensuring you never miss that elusive "peak". The blossoming of the Dogwood which overwhelms you with its color is caught in its entirety. Even a house being built whether it's by you or the spider in the garden can be captured throughout the building process.

We at Brinno Incorporated are very proud to introduce the

### GardenWatchCam

- The GardenWatchCam is a low cost, EASY to use, weather resistant, time lapse camera. The GardenWatchCam is EASY to mount in the ground and uses a high quality lens to target your chosen gardening area, or a single bloom.
- The GardenWatchCam is designed to take photos at specific predetermined time settings chosen by the individual user. The user has the option of choosing between 7 different time settings ranging from :

- 1st setting: 1 minute
- 2nd setting: 5 minutes
- 3rd setting: 30 minutes
- 4th setting: 1 hour
- 5th setting: 4 hours
- 6th setting: 24 hours
- 7th setting: Customized setting created by the user on a PC with Brinno' provided software.

The first 6 settings and are chosen simply by opening up the camera and turning the switch to the desired time, when the power is off. The seventh custom setting is created by the user by inserting their USB Flash Drive into the GardenWatchCam which downloads our software onto the USB Flash Drive. The user then inserts the USB Flash Drive into their computer and follows the directions on their screen allowing them to customize any specific time setting that they want to have their GardenWatchCam take photos at.

## » About Brinno

Brinno Incorporated is dedicated to providing products that enhance the enjoyment and safety of family life.

Brinno is focused on education, leisure, hobby and personal safety cameras, designed with quality and manufactured for reliability. Brinno has put together a team consisting of world class semiconductor partners, experienced EE design engineers, multiple OEM electronics manufacturing, materials tooling and manufacturing partners, allowing control of manufacturing costs while ensuring the highest standards of design and quality. Brinno products are available online and worldwide through better retailers everywhere.
