Perforation cutter

DB 83259603EN
valid from: 01.04.2010

General description

The perforation cutter also permits the perforation of the material in order to separate it manually. The tool is compatible to the FLEXIMARK® Transfer printer A4+M/300 and is adjustable by the operation of the printer. This ensures the cutting or perforation at the right place.

Product features

The cutter is used to cut and perforate labels and heat shrinkable tubing with the materials paper, cardboard, textile, Synthetics like PET, PE, PP, PVC, PU, Acrylat and PI.
