Application

Fieldbus cable for the Siemens field network SIMATIC NET (acc. to DIN 19245 part 3 and EN 50170), for fieldbus system FIP (Factory Instrumentation Protocol) as well as for high performance data networks with 150 Ohms nominal impedance. The cable is designed for the system-defined transmission rates of 1.5 Mbit/s, 2.5 Mbit/s and 12 Mbit/s, the transmission characteristics are conform to the system and guarantee a high operating security during data transmission.

Due to its double screening it is suitable for installation in electromagnetically demanding areas. The cable is intended for permanent installation inside and outside as well as for underground burial. The outer sheath is unaffected by atmospheric UV-radiation at above-ground installation.
