WALSER

Walimex Weight Bar for Backgrounds, 280cm

Item number: 17402

- convenient weight bar for paper backgrounds
- simple fixation with tape (not included) at the bottom of the background
- keeps the background from coiling up unintentionally
- with spirit levels on both ends for horizontal fixation
- compact storage and transport in three parts
- also suitable for fabric backgrounds

Item description

Due to the light material, paper backgrounds often coil up unintentionally. The Weight Bar by walimex with a length of approx. 280cm solves this well-known problem in a particularly clever manner. It is simply attached to the bottom of the background with tape and like that weighs down the end of the paper, keeping it from coiling up.

Two spirit levels on both ends of the bar allow an exact alignment of the bar horizontally to the ground. For storage and transport, the bar can be dismantled into three separate parts, which can be stored away compactly with a length of approx. 92cm each.

Of course the bar can also be used for weighing down fabric backgrounds. For this it can simply be inserted into the loop at the bottom end of the background.

Technical specification

General information

Product Type	Background systems equipment
Material	Metal
Product Color	Black
Montage	Pole system
Min. Width	2800
Max. Width	2800mm
Weight	800g

Specifications

Max. Width	2800mm
-------------------	--------

Packaging

Girth	195mm
Height of Packaging	39mm
