

## Fat Shark Specification Document

**Model Number:** 1607  
**Model Name:** 4S Filtered Balance Lead TX Supply  
**Document Revision/Date:** Rev A / 08.04.2014

### Product Description:

Supplying power to your FPV transmitter and camera from your 2S, 3S or 4S RC pack is a snap with this handy filtered adapter. This latest version now supports up to 4S packs commonly used in multi-copters (check transmitter specification to verify your transmitter's maximum voltage input rating prior to connecting) without the hassle of a 2nd battery or rewiring the main discharge lead. Comes with a 2p/2p Molex cable to plug /play with your Immersion RC or Fat Shark transmitter. Integrated low pass filter removes unwanted noise in the TX image caused by servos and speed controllers.

### Specifications:

#### *Electrical:*

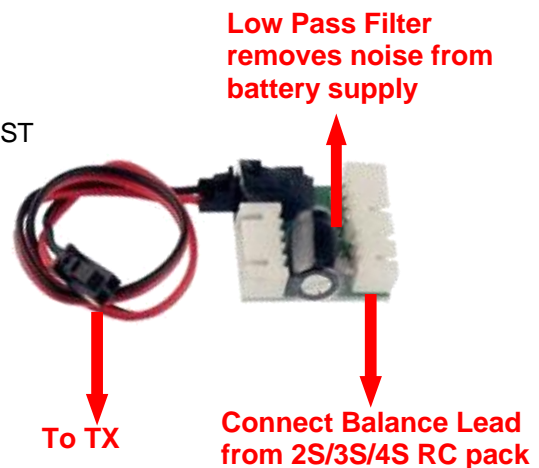

- Rating: Up to 2A, 18V
- Input connectors: 2p, 3p, 4p (2S, 3S, 4S) 2.54mm JST
- Output connector: 2p, 2.54mm locking Molex

#### *Mechanical:*

- Size: 24 x 26 x 8 mm

#### *Packaging:*

- Packed with typical PE plastic bag

### Operational Advice:

Make sure your TX can support 4S input: check transmitter specification to verify its maximum voltage input rating prior to connecting.
