# SMALL LINEAR THERMOELECTRIC ACTUATORS

## Smart-T

#### PRODUCT DATA

## **APPLICATION**

Smart-T small linear actuators are used in room and zone applications for time-controlled two-point and pulse-widthmodulated (PWM) regulation of heating and cooling systems such as fan coil units, radiators, floor heating systems, chilled ceilings, and convectors.

- Fit on standard M30 x 1.5 heating/cooling valves, thermostatic radiator valves, and valve inserts for manifolds and compact radiators.
- Special valve adapters on request.

#### **FEATURES**

- No mounting tools required (easily mounted using valve adapter)
- Water-protected housing design in all mounting positions
- Pluggable cable for easy installation and servicing
- Auxiliary switch models for driving pumps or fans
- Low power consumption models
- Normally-open and normally-closed models
- Compact design allows installation in limited space
- Visual indicator showing valve position and type of action (NO or NC)
- **Noiseless operation**
- Reliable long-term operation
- Overload protection (4 kV) for 230 V models

## **MOUNTING**

**NOTE:** Connection leads must not touch piping (heat transfer).

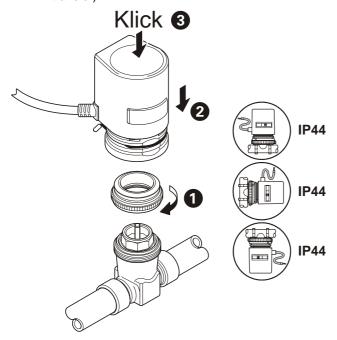

Fig. 1. Mounting / installation positions

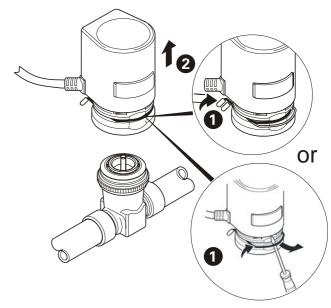

Fig. 2. Dismounting

# **FUNCTION**

When the operating current is applied, a PTC resistor heats up a wax element. After a delay, this wax element expands, causing stroke movement.

## **Position Indicator**

The position indicator (the red indicator behind the window on the face of the actuator) shows the model's type of action (NO or NC) as well as the current stroke position.

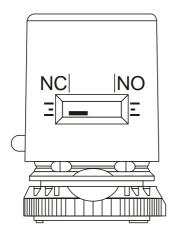

Fig. 3. Position indicator

## **WIRING**

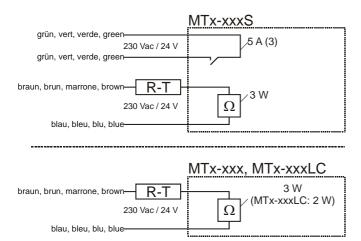

Fig. 4. Wiring diagrams

# **Opening and Closing Time**

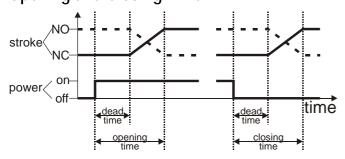

Fig. 5. Opening and closing time

**NOTE:** Opening and closing times depend upon ambient temperature and model.

#### Valve Action

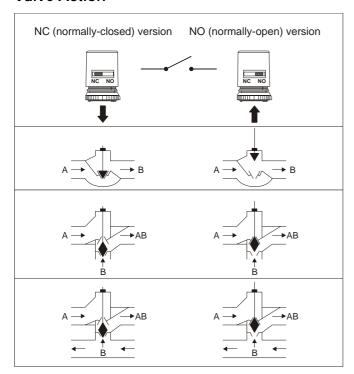

Fig. 6. Valve action

Normally open: 2-way valve, A-B open without power; Normally closed: 2-way valve, A-B shut without power;

**NOTE:** Fig. 6 is a schematic diagram showing typical valve action. Actual function can vary depending upon the

individual type of valve.
