

1. Power up the board by plugging in the USB cable provided, to connector P4 on the element14 BeagleBone Black board, and the USB port on a host system

Alternatively, the board can be powered by plugging an external 5V@1A DC power supply adapter (notincluded) into P1 on the board

2. By default, the board boots up from the on-board 4GB eMMC which is installed with a Linux system.
3. You'll see the LED power indicator lit steadily and other LEDs blink in the pre-set pattern within 10 seconds.
 - USB0 blinks like heartbeats
 - USB1 is turned on when there is any access to the microSD card.
 - USB2 is turned on when the CPU is processing.
 - USB3 is turned on when there is any access to the eMMC.

***BeagleBoard Compliant**

This product bearing the BeagleBoard Compliant Logo has been tested by BeagleBoard.org and has been determined to be BeagleBoard Compliant. "BeagleBoard Compliant" is defined as a product that (a) is identical in technical design and functionality as the specified BeagleBoard.org product with which this product is compliant, and (b) runs on the version of the software provided by BeagleBoard.org to supplier. A product shall be deemed "BeagleBoard Compliant" as of the manufacture date. The "BeagleBoard Compliant" certification does not extend to any additional peripherals that are bundled with the supplier's product. General support for this board is available from the BeagleBoard.org community. All hardware support for this product is the responsibility of element14. Return merchandise authorization support is provided by element14.

1. 用产品附带的USB线缆分别连接 element14 BeagleBone Black开发板上的P4接口和计算机上的USB接口，以便为其提供电源。

或者用一个5V/1A的外接直流电源（产品默认未提供外接电源）连接板上的P1接口也可以为开发板供电。

2. 默认情况下，开发板会从预装了Linux系统的板载4GB eMMC存储器启动。
3. 电源LED将会保持常亮，其他LED在10秒以内以预定的模式闪烁。
 - USR0在启动后以心跳灯的形式闪烁。
 - USR1在读写微型SD卡时亮起。
 - USR2在CPU处理数据时亮起。
 - USR3在读写eMMC时亮起。

***兼容BeagleBoard**

该产品带有BeagleBoard兼容标志并且经BeagleBoard.org测试和确认。“兼容BeagleBoard”是指（a）某一产品和其兼容的指定Beagleboard.org产品在技术设计和功能性方面相同，以及（b）该产品运行的是BeagleBoard.org为供应商提供的软件版本。产品自生产之日起就应该视为“兼容BeagleBoard”。“兼容BeagleBoard”认证并不包括供应商捆绑销售的任何附带的外设。

BeagleBoard.org社区为该开发板提供一般性支持。对于该产品的所有硬件支持由element14提供。商品退货授权服务由element14提供。请访问beagleboard.org/logo获取更多信息。

文档和其他资源

所有用于BeagleBone Black的插件板都能兼容element14 BeagleBone Black
