# Introduction

Congratulations on purchasing Transcend's **JetFlash**<sup>®</sup>. This handy little device lets you connect to any desktop or notebook computer with a USB port for fast, easy data transfer. The **JetFlash**<sup>®</sup> is completely plug-and-play, and has a large storage capacity as well as fast transfer rates, making it perfect for storing and transporting your files, folders, documents, photos and other personal digital content. In addition, the **JetFlash**<sup>®</sup>'s small convenient size, superior data retention and impressive appearance will provide you with a brand-new data storage experience.

## Package Contents

The **JetFlash**<sup>®</sup> package includes the following items:

- JetFlash<sup>®</sup> USB Flash Drive
- Quick Start Guide
- Software CD (certain models)
- Lanyard, strap, or key ring accessory (refer to package for specific type)

## Features

- Hi-Speed USB 2.0 compliant and backwards compatible with USB 1.0/1.1
- Vista compatible
- Supports Windows ReadyBoost<sup>®</sup> (Hi-Speed series)
- Easy Plug and Play installation
- Driverless
- Powered via the USB port. No external power or battery needed
- Includes useful data-management software

## System Requirements

Desktop or notebook computer with a USB port and one of following operating systems:

- Windows<sup>®</sup> Me
- Windows<sup>®</sup> 2000
- Windows<sup>®</sup> XP
- Windows Vista<sup>®</sup>
- Windows<sup>®</sup> 7
- Mac<sup>®</sup> OS 9.0, or later
- Linux<sup>®</sup> Kernel 2.4.2, or later

# Driver Installation

## Driver Installation – Windows® Me, 2000, XP, 7 and Vista

No drivers are required. Newer Windows operating systems have built-in drivers that support the **JetFlash®**. Simply plug your **JetFlash®** into an available USB port and Windows will automatically install the files needed to use your device. A “**Removable Disk**” with a newly assigned drive letter will appear in the **My Computer** window.

## Driver Installation – Mac® OS 9.0, or Later

No drivers are required. Just plug the **JetFlash®** into an available USB port and your computer will automatically detect it.

## Driver Installation – Linux® Kernel 2.4.2, or Later

No drivers are required. Just plug the **JetFlash®** into the USB port and mount it.

Example: 1. First create a directory for the **JetFlash®**:

```
“mkdir /mnt/jetflash”
```

2. Mount the **JetFlash®**:

```
“mount -a -t msdos /dev/sda1 /mnt/jetflash”
```

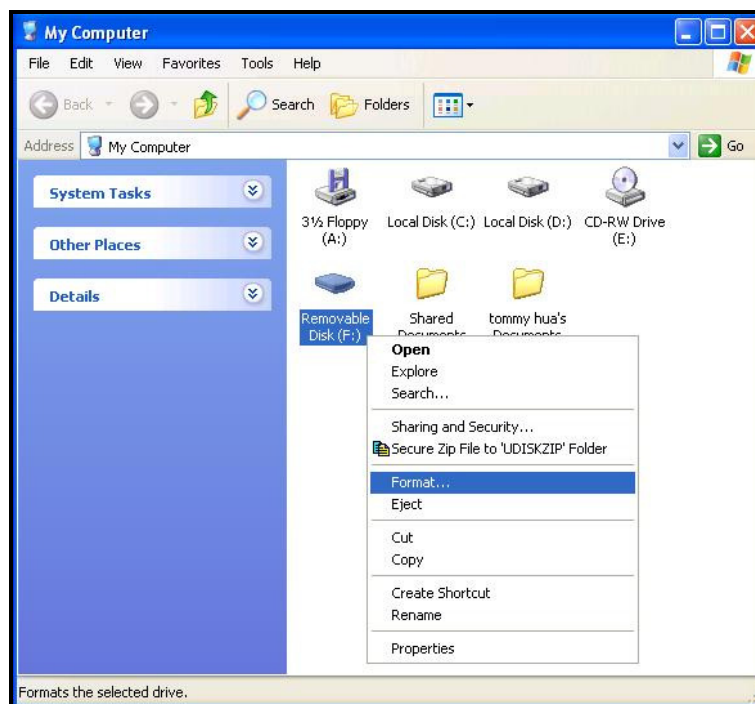

# Formatting the JetFlash® in Windows®

1. Plug the **JetFlash®** into an available USB port.
2. Open the “My Computer” window.
3. Right-click on the “Removable Disk” icon that represents the JetFlash®.
4. Select “**Format**” in the drop down menu.

**WARNING! Formatting the disk will erase all of the data on your JetFlash®**

5. Click on the “**Start**” button and follow the on-screen instructions to format the **JetFlash®**.

# Safely remove the JetFlash<sup>®</sup> from your Computer

## Proper JetFlash<sup>®</sup> Removal – Windows<sup>®</sup> Me, 2000, XP, 7 and Vista

1. Click on the Removable Hardware icon  in the system tray.
2. The “**Safely Remove Hardware**” pop-up menu will appear. Select it to continue.

3. A message box will appear stating: “The ‘USB Mass Storage Device’ device can now be safely removed from the system.”

4. Unplug the **JetFlash<sup>®</sup>** from your computer.

## Proper JetFlash<sup>®</sup> removal – Mac<sup>®</sup> OS 9.0 or Later, Linux<sup>®</sup> Kernel 2.4.2 or Later

First drag the Disk icon that corresponds to your **JetFlash<sup>®</sup>** into the trashcan, then unplug your **JetFlash<sup>®</sup>** from the USB port.

**WARNING! Improper removal of the JetFlash<sup>®</sup>, unstable system power, or system hang-ups / hard re-boots while data is being written to the JetFlash<sup>®</sup> may cause file corruption or permanent damage to the drive. The best way to prevent this is to avoid opening and continuously editing files directly from the JetFlash<sup>®</sup>. It is strongly recommended that you copy files from the JetFlash<sup>®</sup> to your hard disk first, then edit the files from the hard disk instead. Transfer the files back to the JetFlash<sup>®</sup> after editing.**
