

mantona[®]

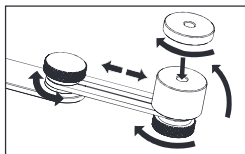

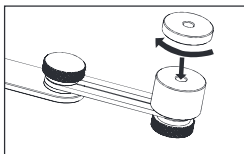

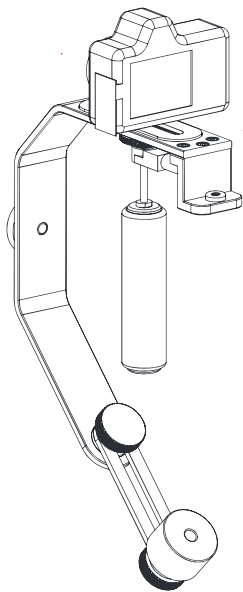

for Action-Cams

mantona[®]

 **General notes:**

- Make sure that all screws have been tightened
- Before each use make sure that your equipment has been properly installed and fits tightly
- Take care when using the handle – danger of squeezing

mantona[®]

Assembly:

1. Fasten the camera on the steadycam
2. Adjust the position so that the bubble level is visible
3. Hold the steadycam by its handle and test the alignment
4. Keep changing the weight and the position of the counter-weights, until the steadycam is balanced
5. The steadycam is correctly aligned when the camera holds its position, even in case of jerky movements
