

Spektrum Programmer Beta

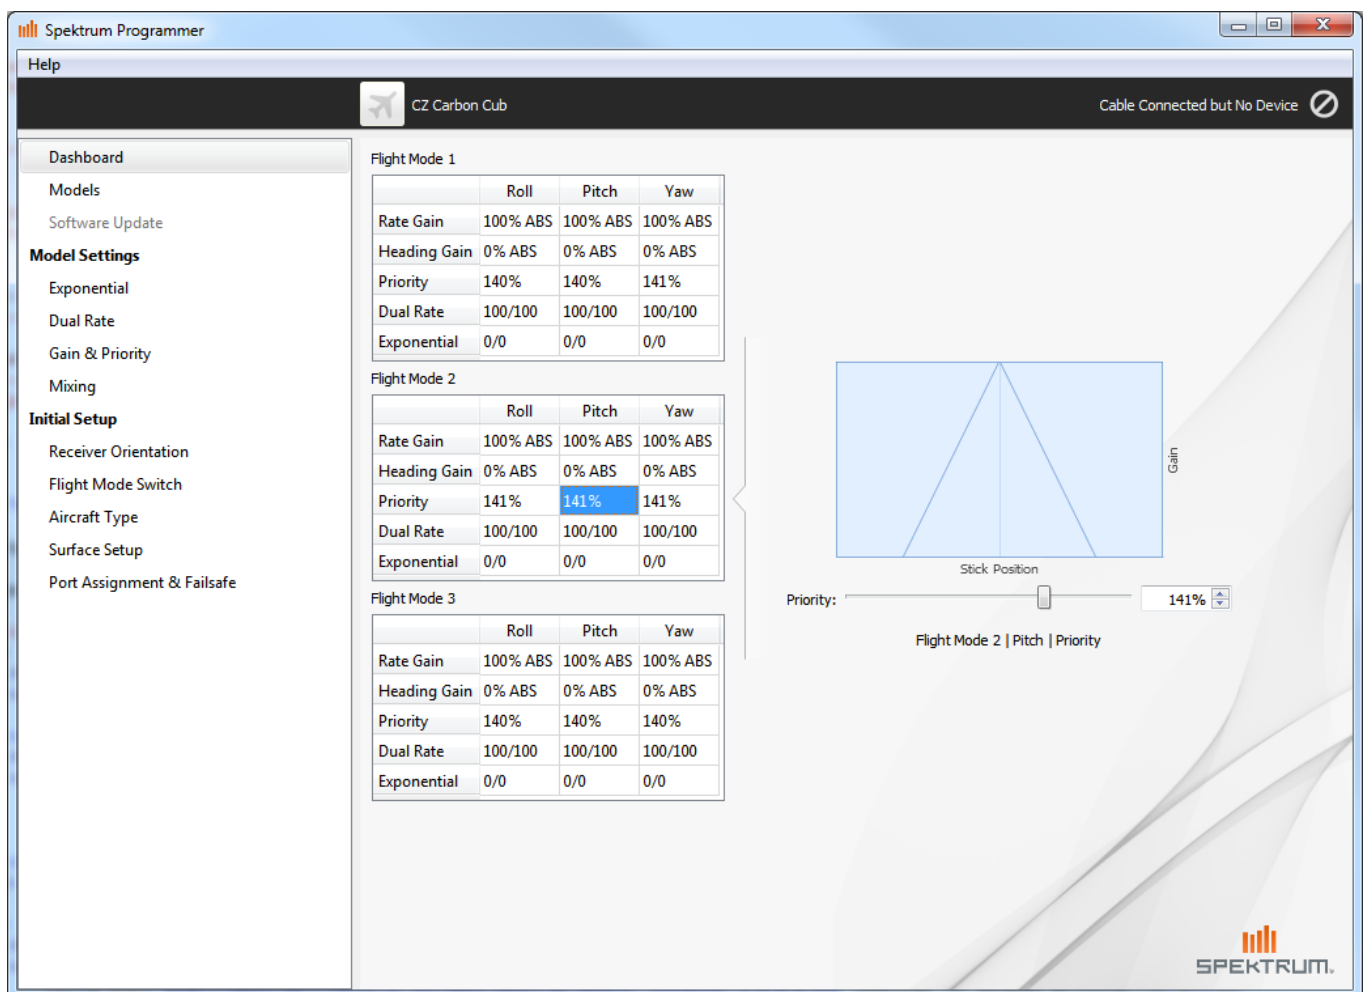

Spektrum Programmer allows you to configure settings, load model presets, and update the software on your receiver or transmitter.

To connect a receiver:

1. Open Spektrum Programmer from the Start Menu or Desktop.
2. Plug the USB programmer cable (SPMA3065) into the computer and plug the cable into the BIND/PROG port of the receiver.
3. Supply power to the receiver with a battery.

To connect a transmitter:

1. Open Spektrum Programmer from the Start Menu or Desktop.
2. Plug the USB programmer cable (SPMA3065) into the computer and plug the cable into the servo port on the back of the transmitter (above the trainer port).
3. Turn on the transmitter.

1. Version 1.1 (Released October 1, 2015)

- [Download for Windows XP/Vista/7/8/10](#)

Known Issues

- When expo is activated on the DXe, it is only applied to low rates and not high rates.

Changes

- Added support for the DXe
- Added a trash for models

2. Version 1.0 (Released April 24, 2015)

- [Download for Windows XP/Vista/7/8/10](#)
