

## Quick reference

MA10650 rain sensor

**MOBILE-ALERTS**

### MOBILE-ALERTS Sensor

This is a sensor for the "MOBILE-ALERTS" system, it can be used with this system only. To use the sensor you need a MOBILE-ALERTS gateway.

### Quick Setup

Resolve the seesaw inside the sensor. It greatly improves the distance if the rain bucket is mounted 1 m above the ground!

### Sensor set up

Open the battery compartment of the temperature sensor and put in 2x AA batteries with the correct polarity.

### Add Sensor

Open the app, dashboard is displayed. Tap "Add new sensor" and scan the QR code on the base of the rain sensor. Then set a name for the sensor.

## Specifications

Batteries:	2 x mignon (LR06, AA) alkaline
Battery life:	approx. 2 years
Measuring range:	0 to 300 mm/h
Accuracy:	0,25 mm
Operating temperature range:	0°C to +40.0°C
Transmission range:	100m (open area)

More information and detailed instructions can be found in the app at "Info" or at [www.mobile-alerts.eu](http://www.mobile-alerts.eu)

The declaration of Conformity can be found at: [www.mobile-alerts.eu/technoline/doc](http://www.mobile-alerts.eu/technoline/doc)

points.

Old batteries do not belong into general household waste. You are obliged to return used batteries to your vendor or collection

Electrical devices have to be disposed separately from the general household waste. Take your old electronics to your local waste collection point or recycling centre.
