- LED's indicate power on, MIDI in signal and MIDI out signal.
- Supports Windows XP, Vista, Win7, Win8, Win10 and Mac OS X operating systems.

MIDI

USB

## Instructions for use:

### Please follow these steps

1. Connect the cable marked "IN" to the MIDI "OUT" socket of a MIDI keyboard (or MIDI device)
2. Connect the cable marked "OUT" to the MIDI "IN" socket of a MIDI keyboard (or MIDI device).
3. Plug the USB cable into any free USB socket on your computer, the red LED will light to show power on.
4. Open your music software program, e.g. Cubase, Sonar, MIDI Connections, etc.
5. Set the music programs MIDI In and MIDI Out devices to "USB Audio Device"
6. Your USB to MIDI interface is now ready for use.
7. To save potential problems, it is recommended that this interface is always connected to the same USB as it was originally installed on USB to prevent multiple installations of the driver.
