Virtual instrument application

A virtual instrument application allows having unique, real-life experience with a meter. The application is a visualization of inter alia the meter's display and functions. The user has a possibility to make changes in the configuration of the instrument and carry out all possible measurements like in the reality. Such an opportunity gives the user a closer look and allows getting to know the functioning of the instrument.

Please click on the link to activate the virtual instrument panel.

- Sonel MIC-30 [1]
- Sonel MIC-5010 [2]
- Sonel MIC-10k1 [3]
- Sonel MRU-30 [4]
- Sonel MRU-200-GPS [5]
- Sonel MPI-530 [6]

Virtual instrument application off-line:

- Sonel MIC-30 [7]
- Sonel MIC-5010 [8]
- Sonel MIC-10k1 [9]
- Sonel MRU-30 [10]
- Sonel MRU-200-GPS [11]
