

### LED WORK LIGHT INSTRUCTION

### 1. Light Structure and Features

- a. This light is unique, novel. Its back cover and front cover can be separated, easy to install and replace.
- b. The shell is ADS12 Casting aluminum with heatsink. Its surface is electrostatic sprayed and solidified in constant temperature so that its adhesion force is strong.
- c. It has good waterproof, dustproof, and shock-proof.

# 2. Application

Applying to automobiles, trucks, off-road vehicles, excavators, agricultural machinery, marine machinery, etc.

# 3. Product Specification

- a. Model: TP917
- b. Size: 175\*86\*202mm
- c. Power: 51W
- d. Voltage: 10-30V
- e. Luminous flux: 3740lm
- f. Beam types: Flood
- g. LED Lead Quantity: 17pcs\*3W
- h. Color temperature: 6000K
- i. Waterproof: IP67
- j. Material: ADS12 Casting aluminum with heatsink
- K. Mounting Bracket: Aluminum
- L. Life Time: 30000 hours
- m. Weight: 2.6kg

#### 4. Installing Requirement & Maintenance

- a. First of all, all the component and accessories should be organized.
- b. Before installation, test the light to make sure it can work properly. (Red line is positive, black line is negative.)
- c. First, install the hex nuts on the bolts, and twist the spring meson.

- d. Make the bolts go through the mounting holes, and set into the spring meson, and then tighten the hex nut.
- e. Connect the power line to the corresponding power connector.
- f. Finally, make sure the light is installed steadily, and then start the power.

#### 5. Notes

- a. It is unqualified if there was breakage in the light shell or glass/plastic cup; the light should not be used.
- b. When installing, the power should be cut off to avoid injury to body
