## DATASHEET - AFDD-16/2/C/003-A

Part no. Catalog No.

**EL-Nummer** 

(Norway)

Arc Fault Detection Device, 2p, C, 16 A, 30 mA, type A

AFDD-16/2/C/003-A 187210

1601437

Powering Business Worldwide"

Similar to illustration

## **Delivery program**

| Basic function                                       |                 |    | Arc fault detection device                             |
|--|-----------------|----|--|
| Number of poles                                      |                 |    | 2 pole   |
| Tripping characteristic                              |                 |    | C  |
| Application  |                 |    | Switchgear for residential and commercial applications |
| Rated current  | In              | Α  | 16   |
| Rated switching capacity according to IEC/EN 60898-1 | I <sub>cn</sub> | kA | 10   |
| Rated switching capacity according to IEC/EN 61009   |                 | kA | 10   |
| Rated short-circuit strength                         | I <sub>cn</sub> | kA | 10   |
| Rated fault current                                  | $I_{\Delta N}$  | А  | 0.03   |
| Туре   |                 |    | Туре А   |
| Tripping   |                 | s  | non-delayed  |
| Busbar type  |                 |    | ZV-SS  |
| Product range  |                 |    | AFDD   |
| Sensitivity  |                 |    | Pulse-current sensitive                                |
| Impulse withstand current                            |                 |    | Partly surge-proof 250 A                               |

## **Technical data**

| Electrical   |                 |      |  |
|--|-----------------|------|--|
| Types conform to                                     |                 |      | IEC/EN 62606<br>IEC/EN 61009                                     |
| Current test marks                                   |                 |      | As per inscription   |
| Rated switching capacity according to IEC/EN 60898-1 | I <sub>cn</sub> | kA   | 10   |
| Limit values of the operating voltage                |                 |      |  |
| Test circuit   |                 | V AC | 170 - 264  |
| Sensitivity  |                 |      | Pulse-current sensitive  |
| Rated short-circuit strength                         | I <sub>cn</sub> | kA   | 10   |
| lifespan   |                 |      |  |
| Electrical   | Operations      |      | ≧ 4000   |
| Mechanical   | Operations      |      | ≧ 20000  |
| Mechanical   |                 |      |  |
| Standard front dimension                             |                 | mm   | 45   |
| Device height  |                 | mm   | 80   |
| Built-in width                                       |                 | mm   | 54 (3TE)   |
| Mounting   |                 |      | Tristable slide catch enables removal from existing combination. |
| Degree of Protection                                 |                 |      | IP20 switches<br>IP40 enclosed                                   |
| Terminals top and bottom                             |                 |      | Twin-purpose terminals   |
| Terminal protection                                  |                 |      | Busbar tag shroud as per VBG4, ÖVE-EN 6                          |
| Thickness of busbar material                         |                 | mm   | 0.8 - 2  |
| Admissible ambient temperature range                 |                 | °C   | -25 - +40  |
| Permissible storage and transport temperatures       |                 | °C   | -35 - +60  |
| Climatic proofing                                    |                 |      | according to IEC/EN 61009  |
| Contact position indicator                           |                 |      | red / green  |

| Design verification as per IEC/EN 61439  |                  |    |  |  |
|--|------------------|----|--|--|
| Technical data for design verification   |                  |    |  |  |
| Rated operational current for specified heat dissipation   | l <sub>n</sub>   | А  | 16   |  |
| Equipment heat dissipation, current-dependent  | P <sub>vid</sub> | W  | 7  |  |
| Operating ambient temperature min.   |                  | °C | -25  |  |
| Operating ambient temperature max.   |                  | °C | 40   |  |
| IEC/EN 61439 design verification   |                  |    |  |  |
| 10.2 Strength of materials and parts   |                  |    |  |  |
| 10.2.2 Corrosion resistance  |                  |    | Meets the product standard's requirements.   |  |
| 10.2.3.1 Verification of thermal stability of enclosures   |                  |    | Meets the product standard's requirements.   |  |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   |                  |    | Meets the product standard's requirements.   |  |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects |                  |    | Meets the product standard's requirements.   |  |
| 10.2.4 Resistance to ultra-violet (UV) radiation   |                  |    | Meets the product standard's requirements.   |  |
| 10.2.5 Lifting   |                  |    | Does not apply, since the entire switchgear needs to be evaluated.   |  |
| 10.2.6 Mechanical impact   |                  |    | Does not apply, since the entire switchgear needs to be evaluated.   |  |
| 10.2.7 Inscriptions  |                  |    | Meets the product standard's requirements.   |  |
| 10.3 Degree of protection of ASSEMBLIES  |                  |    | Does not apply, since the entire switchgear needs to be evaluated.   |  |
| 10.4 Clearances and creepage distances   |                  |    | Meets the product standard's requirements.   |  |
| 10.5 Protection against electric shock   |                  |    | Does not apply, since the entire switchgear needs to be evaluated.   |  |
| 10.6 Incorporation of switching devices and components   |                  |    | Does not apply, since the entire switchgear needs to be evaluated.   |  |
| 10.7 Internal electrical circuits and connections  |                  |    | Is the panel builder's responsibility.   |  |
| 10.8 Connections for external conductors   |                  |    | Is the panel builder's responsibility.   |  |
| 10.9 Insulation properties   |                  |    |  |  |
| 10.9.2 Power-frequency electric strength   |                  |    | Is the panel builder's responsibility.   |  |
| 10.9.3 Impulse withstand voltage   |                  |    | Is the panel builder's responsibility.   |  |
| 10.9.4 Testing of enclosures made of insulating material   |                  |    | Is the panel builder's responsibility.   |  |
| 10.10 Temperature rise   |                  |    | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |  |
| 10.11 Short-circuit rating   |                  |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |  |
| 10.12 Electromagnetic compatibility  |                  |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |  |
| 10.13 Mechanical function  |                  |    | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |  |

## **Technical data ETIM 7.0**

Circuit breakers and fuses (EG000020) / Earth leakage circuit breaker with auxiliary device (EC002695)

Electric engineering, automation, process control engineering / Electrical installation, device / Residual current protection system / Earth leakage circuit breaker with auxiliary device (ecl@ss10.0.1-27-14-22-13 [ADI479007])

| (ecl@ss10.0.1-27-14-22-13 [ADI479007])              |    |                        |
