

NH fuse extractor

INSTRUCTION OF USE

- Insertion or replacement of NH fuse-links only by authorized persons.
- In case of possible electric arcs or in case of larger currents an Additional protective screen or safety glasses and the gauntlet are Compulsory. Optimum protection is reached by using a helmet with protective face screen.
- Check before every use that the handle and the protective equipment is safe. Damaged equipment shall not be used.
- Following VDE 0680-4 it is not allowed that NH handles remain permanently on inserted NH fuse-links. The handle may only be used for insertion and replacement.
- According to VDE regulations the handle may be used in equipment with rated voltages up to 1000 V.
- Mounting of the handle: push handle on gripping-lugs and move it upward.
Handle will lock in place.
- Demounting of the handle: push button, move handle downward, pull handle off fuse-link.
