

EXTREME SOLAR COMPACT LIGHTWEIGHT SOLAR CHARGER

The extreme solar is a lightweight, clamshell solar panel, offering a 5 watt, 5V 2A output - perfect for charging smaller devices on the move. The panel opens to a 220° angle, making it easy to attach to back packs, tents or bike panniers. With a 3-colour LED to indicate strength of power output, the extreme solar offers reliable solar charging from a compact unit.

CHARGES:
