

RUGGED WATER RESISTANT 5V & 20V SOLAR PANEL SOLARGORILLA

YOU CAN:
CHARGE LAPTOPS
NETBOOKS IPADS
IPHONES &
SMARTPHONES
MOBILE PHONES GPS
SAT-NAVS E-READERS
IPODS MP3 PLAYERS
& MORE

In the desert, on safari, up a mountain or simply on the move, the solargorilla portable solar charger is the perfect companion to the powergorilla and minigorilla. The solargorilla is ideal for anyone who finds themselves away from mains power for long periods or where there is not a reliable power source.

Harnessing energy from under the sun, the solargorilla works via two technically advanced solar panels to ensure superb power and reliable performance, all housed in tough outer casing.

Made for
iPod iPhone iPad

 - 9 mobile device tips
 - DC extension cable
 - Neoprene travel case
 - Velcro strap
 - In-car socket
- Other tips can be purchased from www.powertraveller.com

HOW TO USE SOLARGORILLA:

Simply open the two panels and expose to direct sunlight to put your solargorilla to work. The technically advanced solid panels ensure superb power and reliable performance in a tough casing that's ready to travel.

To increase the efficiency of your solar product, make sure the panels directly face the sun at all times and move accordingly throughout the day. For optimum performance, your solar product should be outside in direct sunlight without obstruction, this includes glass windows.

TO POWER YOUR LAPTOP/NOTEBOOK:

- Select the correct connector tip for your laptop/notebook from the 8 laptop/notebook tips included in the pack.
- Connect the solargorilla to your laptop/notebook, insert the 2 metre charging cable in the solargorilla's output socket.
- Place the solargorilla in direct sunlight. Please refer to the laptop/notebook compatibility table.

TO CHARGE OTHER DEVICES:

- Use solargorilla to charge your iPad, iPhone, iPod, PDAs, MP3/MP4, hand-held games consoles, Sat-Navs, Nokia, Mini Nokia, Motorola, Samsung, LG & Sony Ericsson and many standard mobile phones.
- To charge your iPad, iPhone or iPod – use the white sync / charge cable supplied with your Apple device.
- Select and connect the appropriate tip from the tip pack for your device. Use the 2 metre USB connector cable and insert the USB into the USB port of the solargorilla.
- To power MacBook/MacBook Pro/MacBook Air – please use Apple MagSafe Airline Adaptor not supplied in the pack. Simply plug the MagSafe adaptor into the 12v in-car socket which comes with the solargorilla.

"Made for iPod," "Made for iPhone," and "Made for iPad" mean that an electronic accessory has been designed to connect specifically to iPod, iPhone & iPad, respectively, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod, iPhone or iPad may affect wireless performance.
