

## Data Sheet

Heat shrinkable cable end caps with spiral adhesive coating

### Applications:

It is injection-molded with polyolefin and has UV and abrasion resistance. Hot melt adhesive is coated in a spiral shape inside the tube, providing reliable waterproof and insulation protection for the cut surface of cables or air-filled cables.

Operating temperature range:

Continuous operating temperature: -55°C~110°C

Minimum shrink temperature: 80°C

Full recovery temperature: Above 120°C

Shrink ratio: 2:1

Can be easily installed on the cable end

Excellent abrasion resistance and mechanical protection
