Power Cord for the United Kingdom

When using the instrument in the United Kingdom, make sure the power cord meets the following safety instructions.

NOTE: This lead/appliance must only be wired by competent persons.

WARNING: THIS APPLIANCE MUST BE EARTHED IMPORTANT: The wires in this lead are coloured in accordance with the following code:

Green/ Yellow:	Earth	OE
Blue:	Neutral	
Brown:	Live (Phase)	

As the colours of the wires in main leads may not correspond with the coloured marking identified in your plug/appliance, proceed as

The wire which is coloured Green & Yellow must be connected to the Earth terminal marked with either the letter E, the earth symbol ) or coloured Green/Green & Yellow.

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Blue or Black. The wire which is coloured Brown must be connected to the terminal marked with the letter L or P or coloured Brown or Red. If in doubt, consult the instructions provided with the equipment or

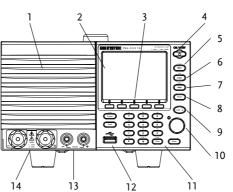

contact the supplier. This cable/appliance should be protected by a suitably rated and approved HBC mains fuse: refer to the rating information on the equipment and/or user instructions for details. As a guide, a cable of 0.75mm<sup>2</sup> should be protected by a 3A or 5A fuse. Larger conductors

would normally require 13A types, depending on the connection method used. Any exposed wiring from a cable, plug or connection that is engaged in a live socket is extremely hazardous. If a cable or plug is deemed hazardous, turn off the mains power and remove the cable, any fuses and fuse assemblies. All hazardous wiring must be

#### immediately destroyed and replaced in accordance to the above standard.

# GETTING STARTED

The Getting Started chapter introduces the inst main features, appearance, and set up procedu

### Overview

The PEL-3000E is an economic, standalone, hig performance DC electronic load positioned to wide range of different power sources. The DC electronic load is fully programmable to simula anything from basic static loads to complex dy loads. The PEL-3000E is extremely robust and of molding to any test environment.

#### Model Line Up

	Operating	
Model	Voltage (DC)	Current
PEL-3031E	1V-150V	6A (Low range)
		60A (High range)
PEL-3032E	2.5V-500V	1.5A (Low range)
		15A (High range)

### Main Features

Performance	•	High slew rates of up to 2 for a fast response speed 3031E) High resolution – 16 bit

5. Measurement area

#### First Time Use Instructions

Use the following procedures when first using the PEL-3000E to power up the instrument, restore the factory default settings and check the firmware version. Lastly, the Conventions section will introduce you to the basic operating conventions used throughout the user manual.

BNC

onal)

#### Power Up

- 1. Insert the AC power cord into the power socket.
- 2. Turn the power switch on -0**|→|**-0ĭ from the rear panel.  $(O \rightarrow -)$
- 3. If the unit doesn't turn on, press the ON/STBY key on the front panel.
  - The ON/STBY key will go from standby (red) to ON (green).

The unit will show the splash screen and then 4. load the settings from when the unit was last powered down.

#### Load Default Settings

When first using the PEL-3000E, recall the factory default settings to ensure the unit is in a known state. See the user manual for a list of the default settings.

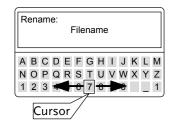

- Select Media/Default [F1] 2
- 3. Select Factory Default [F2]
- Press Factory Default [F2] again to confirm. 4.

Entering Alphanumeric Characters

When renaming files, creating memos or notes, you will be required to enter alphanumeric characters when the character entry screen appears.

- Only alphanumeric characters as well as • space [], underscore [\_] and minus [-] characters are allowed.
- 1. Use the scroll wheel to move the cursor to the desired character.

- 2. Press the Enter key or Enter Character[F1] to select a character.
- To delete a character, press Back Space[F2]. 3.
- To save the file name or memo, press 4 Save[F3].

#### Updating the Firmware

The PEL-3000E allows the firmware to be updated by end-users. Before using the PEL-3000E, please check the GW Instek website or ask your local distributor for the latest firmware. Before updating the firmware, please check the firmware version.

View Firmware Version

- 2. Select System/Info[F1]
- 3. The system information is listed in the display.
  - Model: PEL-303XE
  - Serial Number: XXXXXXXX
  - Firmware Ver.: 1.XX
  - GW Instek website address.

Firmware update

- 2. Select USB with the Media [F1] soft-key.
- Press the File Utility [F5] soft-key. 3.
- 4. Select the \*.UPG upgrade file and press Select[F1] twice. Once to select the file and once to confirm.
- 5. Wait for the update to complete and reset the power.

## > PECIFICATIONS

The following are the basic specifications for the PEL-3000E. For detailed specifications, please see the user manual.

#### Conventions

The following conventions are used throughout the user manual. Read the conventions below for a basic grasp of how to operate the PEL-3000E menu system using the front panel keys.

#### Soft-menu keys

The F1 to F5 function keys at the bottom of the display correspond directly to the soft-menu keys on top.

Select Sub Menu

Pressing this type of soft-menu key will enter a submenu.

	Setting Range	60S-0.002S		6S-0.0002S	
		(0.01666Ω -500Ω)		(0.16666Ω -5kΩ)

\*1: If the ambient temperature is over 30°C or below 20°C, then  $T = \pm |t-25^{\circ}C| \times 100 \text{ ppm/}^{\circ}C \times \text{Set.}$  If the ambient is in the range of  $20 \sim 30^{\circ}$ C, then T = 0 (t is the ambient temperature) \*2: With respect to a change in the current of 10% to 100% of the rating at an input voltage of 1V or 2.5V (during remote sensing).

#### Dynamic Mode

1				
Range	Low	High	Low	High
General				
T1 & T2	0.05mS	5 - 30mS /	Res:1uS	

#### Toggle Parameter or State

This type of soft-menu icon has the function/item on the top of the label and the selected setting or mode on the bottom of the label.

Repeatedly press the associated function key (F1-F5) to cycle through each setting.

For some parameters, a popup window will also appear. Selection of the setting is the same. Repeatedly pressing the relevant function key (F1-F5) will cycle through each setting.

#### Parameter Input

The scroll wheel, Enter key and number pad can be used to edit parameter values.

- 1. Use the scroll wheel to move the cursor to the desired parameter.
  - A scroll bar is shown when there are additional parameters off-screen.

- 2. Press the Enter key to select the parameter.
- Then use the number pad\* or scroll wheel\*\* 3 to edit the parameter value.
