

240 pcs 5 mm Standard LED with 300 mm Cable assortment with LED mount and pre-resistor

Item No.: 00430313

This range of experiments and practitioners with superbright standard LEDs with a diameter of 5 mm, approx. 30 cm flexible strands (stand on) and various series resistors is ideal for immediate start in experiments with semiconductor light. Through resistor combinations of parallel or series connection or varying the supply voltage, different operating currents (brightnesses) can be realized. Addition LED mounting clips for easy mount and installation onto casing or panel.

A brief description of the components contained is clearly printed on the inside of the lid.
