VERSION 12/21

This product is designed to measure voltage and current on a 9 V block battery. Measurements can also be made when the battery is connected to a load. A measuring adapter allows you to connect the load and battery test cables at the same time. The battery test cables connect to a suitable measurement device (e.g. multimeter) to allow you to take measurements. This product is intended for indoor use only. Do not use it outdoors. Contact with moisture (e.g. in bathrooms) must be avoided under all circumstances.
